

1. Record Nr.	UNISA996499864903316
Titolo	Curvilinear micromagnetism : from fundamentals to applications / / Denys Makarov, Denis D. Sheka, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-031-09086-1
Descrizione fisica	1 online resource (420 pages)
Collana	Topics in applied physics ; ; Volume 146
Disciplina	510
Soggetti	Curves Magnetism
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- References -- Contents -- Contributors -- 1 Geometry-Induced Magnetic Effects in Planar Curvilinear Nanosystems -- 1.1 Introduction -- 1.2 Model of Curved 1D Ferromagnetic Systems -- 1.3 Curvature-Induced Effects in Flat Magnetic Systems -- 1.3.1 Wire with a Constant Curvature-Ring-Shaped Wire -- 1.3.2 Wire with a Box-Function Curvature -- 1.3.3 Wire with Periodical Curvature Distribution -- 1.4 Domain Walls in Curved Ferromagnetic Wires -- 1.4.1 Statics of the Domain Wall -- 1.4.2 Dynamics of the Domain Wall -- 1.4.3 Domain Wall Depinning Experiments -- 1.5 Fabrication and Characterization -- 1.5.1 Lithographic Methods -- 1.5.2 Ion-Induced Methods -- 1.5.3 Magnetic Characterization -- 1.6 Conclusion and Outlook -- References -- 2 Effects of Curvature and Torsion on Magnetic Nanowires -- 2.1 Introduction -- 2.2 Geometry of Space Curves -- 2.3 Model of a Curvilinear Ferromagnetic Wire in 3D Space -- 2.3.1 Wires with a Circular Cross-Section -- 2.3.2 Narrow Ribbons -- 2.4 Implications -- 2.4.1 Ground States -- 2.4.2 Linear Dynamics -- 2.4.3 Curvilinear Wires for Spintronics and Spin-Orbitronics Applications -- 2.4.4 Artificial Magnetoelectric Materials -- 2.5 Curvilinear Antiferromagnetic Spin Chains -- 2.5.1 Micromagnetic Description of a Spin Chain -- 2.5.2 Geometry-Driven Biaxial Chiral Helimagnets -- 2.5.3 Interplay Between Anisotropy and Geometry -- 2.5.4 Geometry-Induced Weak Ferromagnetism -- 2.6 Experimental

Studies -- 2.6.1 Fabrication -- 2.6.2 Characterization -- 2.7
 Concluding Remarks and Outlook -- References -- 3 Curvilinear
 Magnetic Shells -- 3.1 Introduction -- 3.2 Fundamentals of Curvilinear
 Magnetism of Shells -- 3.2.1 Lexicon of Differential Geometry of
 Surfaces -- 3.2.2 Magnetic Energy of Curvilinear Shells -- 3.2.3
 Emergent Interactions: Symmetry, Curvature and Textures -- 3.3
 Curvature-Induced Effects.
 3.3.1 Topological Patterning -- 3.3.2 Geometrical Magnetochiral Effects
 -- 3.4 Manipulation of Topologically Protected Magnetic States in
 Curved Shells -- 3.4.1 Skyrmions in Curvilinear Shells Engineered by
 Mesoscale DMI -- 3.4.2 Magnetic Vortex on a Spherical Cap: Polarity-
 Circulation Coupling -- 3.4.3 Control of the Magnetochiral Effects by
 Magnetic Fields -- 3.4.4 Dynamics of Topological Textures in Curved
 Films -- 3.5 Experimental Platforms -- 3.5.1 Hollow Nanoshells: A New
 Playground for Curvilinear Magnetism -- 3.5.2 Nanosphere
 Lithography: A Versatile Tool for Manufacturing Spherically Shaped
 Magnetic Nanostructures -- 3.5.3 Ion-Induced Surface Nanopatterning:
 Bottom-Up Templates for Curvilinear Magnetic Shells -- 3.6 Conclusion
 and Outlook -- References -- 4 Tubular Geometries -- 4.1
 Introduction -- 4.2 Static Properties of Tubular Nanomagnets -- 4.2.1
 Magnetic Configurations at Equilibrium -- 4.2.2 Fabrication of
 Magnetic Tubular Geometries -- 4.2.3 Magnetization Reversal Process
 -- 4.3 Dynamical Properties -- 4.3.1 Chiral Domain Wall Motion --
 4.3.2 Vortex Domain Wall Dynamics-General Remarks -- 4.4 Spin wave
 Propagation -- 4.4.1 Theory of Spin Waves in Magnetic Nanotubes --
 4.5 Summary and Outlook -- References -- 5 Complex-Shaped 3D
 Nanoarchitectures for Magnetism and Superconductivity -- 5.1
 Theoretical Background -- 5.2 Methods of Fabrication of 3D
 Nanoarchitectures -- 5.3 3D Magnetic Nanoarchitectures Fabricated by
 Optical Writing -- 5.4 3D Magnetic Nanoarchitectures Fabricated by
 FEBID -- 5.4.1 Basics and 3D Writing Aspects of FEBID -- 5.4.2 3D
 Magnetic Wireframe Building Blocks -- 5.4.3 3D Magnetic
 Nanoarchitectures -- 5.4.4 Complex-Shaped 3D Nanoarchitectures for
 Plasmonics and Beyond -- 5.5 3D Nanoarchitectures for
 Superconductivity -- References -- 6 Imaging of Curved Magnetic
 Architectures -- 6.1 Introduction.
 6.2 Overview of Microscopy Approaches to Image Curved Magnetic
 Architectures -- 6.2.1 Magneto-Optical Microscopies -- 6.2.2 X-Ray
 Microscopies -- 6.2.3 Electron Microscopies -- 6.2.4 Neutron
 Microscopies -- 6.2.5 Scanning Probe Microscopies -- 6.3 Future
 Directions-Challenges and Opportunities -- References -- 7 Curvilinear
 Magnetic Architectures for Biomedical Engineering -- 7.1 General
 Overview of the Field: Magnetic Micro/Nanomotors -- 7.2 The Role of
 Asymmetry in the Generation of Motion -- 7.2.1 Scallop Theorem --
 7.2.2 Asymmetry of the Micro/Nanomotors -- 7.2.3 Symmetry Breaking
 to Get Deterministic Motion of the Micro-/Nanomotors -- 7.3 Major
 Applications for the Life Sciences and Environment -- 7.3.1
 Environmental and Bio Remediation -- 7.3.2 Biosensing -- 7.3.3 Drug
 Delivery -- References -- 8 Magnetic Soft Actuators: Magnetic Soft
 Robots from Macro- to Nanoscale -- 8.1 Introduction -- 8.2 Mechanics
 of Magnetic Soft Robots -- 8.2.1 Mechanisms of Actuation -- 8.2.2
 Relevant Torques -- 8.2.3 Range of Motion -- 8.2.4 Available Force --
 8.2.5 Available Work -- 8.3 Magnetostatic Energy of Thin Films -- 8.4
 Magnetoelastic Systems at the Nanoscale -- 8.4.1 Nanoscale Flexible
 One-Dimensional Wires -- 8.4.2 Nanoscale Flexible Ribbons -- 8.5
 Concluding Remarks -- References -- 9 Geometrically Curved Magnetic
 Field Sensors for Interactive Electronics -- 9.1 Introduction -- 9.2
 Background -- 9.2.1 Interactive Devices, Human-Machine Interfaces,

and Virtual Reality -- 9.2.2 Soft Human-Machine Interfaces and
Magnetosensitive E-Skins -- 9.2.3 Flexible Electronics and E-Skins --
9.3 Magnetosensitive E-Skins with Directional Perception -- 9.4
Geomagnetosensitive E-Skins -- 9.5 On-Site Conditioned
Magnetosensitive E-Skins -- 9.6 Magnetosensitive E-Skins with
Multimodal Capabilities.
9.7 Magnetosensitive E-Skins with Intrinsic Logic and Out-of-Plane
Detection -- 9.8 Magnetic Soft Actuators with Embedded Flexible E-
Skin Sensing Modules -- 9.9 Summary -- 9.10 Outlook -- References
-- Index.
