

1. Record Nr.	UNISA996499865703316
Autore	Hill James M.
Titolo	Mathematics of particle-wave mechanical systems / / James M. Hill
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	9783031197932 9783031197925
Descrizione fisica	1 online resource (388 pages)
Disciplina	530.15
Soggetti	Mathematical physics Special relativity (Physics) Física matemàtica Relativitat especial (Física) Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Author's Foreword -- Contents -- 1 Introduction -- 1.1 Introduction -- 1.2 General Introduction -- 1.3 Special Relativity -- 1.4 Quantum Mechanics -- 1.5 de Broglie Particle-Wave Mechanics -- 1.6 Plan of Text -- 1.7 Tables of Major Symbols and Basic Equations -- 2 Special Relativity -- 2.1 Introduction -- 2.2 Lorentz Transformations -- 2.3 Einstein Addition of Velocities Law -- 2.4 Lorentz Invariances -- 2.5 Lorentz Invariant Velocity Fields $u(x, t)$ -- 2.6 General Framework for Lorentz Invariances -- 2.7 Integral Invariants of the Lorentz Group -- 2.8 Alternative Validation of Lorentz Invariants -- 2.9 Jacobians of the Lorentz Transformations -- 2.10 Space-Time Transformation $x' = \gamma(x - vt)$ and $t' = \gamma(t - vx/c^2)$ -- 2.11 The de Broglie Wave Velocity $u = c^2/v$ -- 2.12 Force and Physical Energy Arising from Work Done -- 2.13 Lorentz Invariant Energy-Momentum Relations -- 2.14 Force Invariance for Constant Velocity Frames -- 2.15 Example: Motion in an Invariant Potential Field -- 2.16 Alternative Energy-Mass Velocity Variation -- 3 General Formulation and Basic Equations -- 3.1 Introduction -- 3.2 Louis Victor de Broglie -- 3.3 James Clerk Maxwell -- 3.4 Four Types of Matter and Variable Rest Mass -- 3.5 Modified Newton's Laws of Motion

-- 3.6 Identity for Spatial Physical Force ps: $\int \mathbf{F} \cdot d\mathbf{r}$ /StPNE pdfmark /StBMC pdfmarkfps: $\int \mathbf{F} \cdot d\mathbf{r}$ /StPop pdfmark /StBMC pdfmark -- 3.7 Assumed Existence of Work Done Function ps: $\int \mathbf{F} \cdot d\mathbf{r}$ /StPNE pdfmark /StBMC pdfmark $W(x, t)$ ps: $\int \mathbf{F} \cdot d\mathbf{r}$ /StPop pdfmark /StBMC pdfmark.

3.8 Forces ps: $\mathbf{F} = -\nabla V$ /StPNE pdfmark /StBMC pdfmarkfps: $\mathbf{F} = -\nabla V$ /StPop pdfmark /StBMC pdfmark and g Derivable from a Potential ps: $\mathbf{F} = -\nabla V$ /StPNE pdfmark /StBMC pdfmark $V(x, t)$ ps: $\int \mathbf{F} \cdot d\mathbf{r}$ /StPop pdfmark /StBMC pdfmark --

3.9 Correspondence with Maxwell's Equations -- 3.10 Centrally or Spherically Symmetric Systems -- 3.11 Newtonian Kinetic Energy and Momentum -- 3.12 Newtonian Wave-Like Solution -- 3.13 Newtonian Work Done ps: $\int \mathbf{F} \cdot d\mathbf{r}$ /StPNE pdfmark /StBMC pdfmark $W(u, \lambda)$ ps: $\int \mathbf{F} \cdot d\mathbf{r}$ /StPop pdfmark /StBMC pdfmark from ps: $\frac{\partial f}{\partial t} = c^2 \frac{\partial g}{\partial x}$ /StPNE pdfmark /StBMC pdfmark $f/t = c^2 g/x$ ps: $\int \mathbf{F} \cdot d\mathbf{r}$ /StPop pdf --

4 Special Results for One Space Dimension -- 4.1 Introduction -- 4.2 Basic Equations -- 4.3 General Reformulations of Basic Equations -- 4.4 Important Identity -- 4.5 Formulation in Terms of Lorentz Invariants -- 4.6 Differential Relations for Invariants and -- 4.7 de Broglie's Guidance Equation -- 4.8 Vanishing of Force g in Direction of Time -- 4.9 Clairaut's Differential Equation with Parameter u -- 4.10 Hamiltonian for One Space Dimension -- 4.11 Lagrangian for One Space Dimension --

5 Exact Wave-Like Solution -- 5.1 Introduction -- 5.2 Wave-Like Solution -- 5.3 Work Done $W(u, \lambda)$ from $f/t = c^2 g/x$ -- 5.4 Simple Derivation of Wave-Like Solution -- 5.5 Relation to Solution of Special Relativity -- 5.6 Relation to Hubble Parameter.

5.7 Derivation of Integral for Hubble Formula -- 5.8 Dark Matter and Dark Energy as de Broglie States -- 6 Derivations and Formulae -- 6.1 Introduction -- 6.2 Derivation of Wave-Like Solution -- 6.3 Expressions for de Broglie Wave Energy -- 6.4 de Broglie Wave Energy for Particular -- 6.5 Alternative Approach to Evaluation of Integrals -- 6.6 Alternative Derivation for Wave Energy -- 6.7 Alternative Derivation of Exact Solution -- 6.8 Yet Another Approach to Evaluation of Integrals --

7 Lorentz and Other Invariances -- 7.1 Introduction -- 7.2 Force Invariance Under Lorentz Transformations -- 7.3 Lorentz Invariance of ps: $\frac{dE}{dt}$ /StPNE pdfmark /StBMC pdfmark E/dp ps: $\frac{dE}{dp}$ /StPop pdfmark /StBMC pdfmark or ps: $\frac{dE}{d\xi}$ /StPNE pdfmark /StBMC pdfmark E/dp ps: $\int \mathbf{F} \cdot d\mathbf{r}$ /StPop pdfmark /StBMC pdfmark -- 7.4 Lorentz Invariance of Forces -- 7.5 Functional Dependence of Forces -- 7.6 Transformation $x' = \gamma(x - vt)$ and $t' = \gamma(t - vx/c^2)$ -- 7.7 Force Invariance Under Superluminal Lorentz Frames -- 7.8 Particle and Wave Energies and Momenta --

8 Further Results for One Space Dimension -- 8.1 Introduction -- 8.2 Wave Equation General Solution -- 8.3 Trivial Solution Only for Zero Spatial Force -- 8.4 Nontrivial Solutions for Zero Spatial Force -- 8.5 Generalisation of Wave-Like Solution -- 8.6 Solutions with Non-constant Rest Mass -- 8.7 Formulation for Variable

Rest Mass.

8.8 Characteristics ps: $\alpha = c t + x$ /StPNE pdfmark $\alpha = c t + x$ /StBMC pdfmark $\alpha = c t + x$ ps: $\beta = c t - x$ /StPNE pdfmark $\beta = c t - x$ /StBMC pdfmark $\beta = c t - x$ ps: $p(x, t)$ and ps: $E(x, t)$ /StPNE pdfmark $E(x, t)$ /StBMC pdfmark $E(x, t)$ ps: $p(r, t)$ and $E(r, t)$ /StPNE pdfmark $p(r, t)$ /StBMC pdfmark $E(r, t)$ ps: $E + V = \text{constant}$ /StPNE pdfmark $E + V = \text{constant}$ /StBMC pdfmark $E + V = \text{constant}$ ps: $f = \frac{c}{r} \left(g - \frac{2p}{r} \right)$ /StPNE pdfmark $f = \frac{c}{r} \left(g - \frac{2p}{r} \right)$ /StBMC pdfmark $f = \frac{c}{r} \left(g - \frac{2p}{r} \right)$ ps: $e = (e_0^2 + (pc)^2)^{1/2}$ /StPNE pdfmark $e = (e_0^2 + (pc)^2)^{1/2}$ /StBMC pdfmark $e = (e_0^2 + (pc)^2)^{1/2}$ ps: $e = - (e_0^2 + (pc)^2)^{1/2}$ /StPNE pdfmark $e = - (e_0^2 + (pc)^2)^{1/2}$ /StBMC pdfmark $e = - (e_0^2 + (pc)^2)^{1/2}$ ps: $e = pc$, $e_0 = 0$ /StPNE pdfmark $e = pc$, $e_0 = 0$ /StBMC pdfmark $e = pc$, $e_0 = 0$ ps: $e = -pc$, $e_0 = 0$ /StPNE pdfmark $e = -pc$, $e_0 = 0$ /StBMC pdfmark $e = -pc$, $e_0 = 0$ -- 9.10 Positive Energy (I) $e = (e_0^2 + (pc)^2)^{1/2}$ /StPNE pdfmark $e = (e_0^2 + (pc)^2)^{1/2}$ /StBMC pdfmark $e = (e_0^2 + (pc)^2)^{1/2}$ ps: $e = - (e_0^2 + (pc)^2)^{1/2}$ /StPNE pdfmark $e = - (e_0^2 + (pc)^2)^{1/2}$ /StBMC pdfmark $e = - (e_0^2 + (pc)^2)^{1/2}$ ps: $e = pc$, $e_0 = 0$ /StPNE pdfmark $e = pc$, $e_0 = 0$ /StBMC pdfmark $e = pc$, $e_0 = 0$ -- 9.11 Negative Energy (II) $e = - (e_0^2 + (pc)^2)^{1/2}$ /StPNE pdfmark $e = - (e_0^2 + (pc)^2)^{1/2}$ /StBMC pdfmark $e = - (e_0^2 + (pc)^2)^{1/2}$ ps: $e = -pc$, $e_0 = 0$ /StPNE pdfmark $e = -pc$, $e_0 = 0$ /StBMC pdfmark $e = -pc$, $e_0 = 0$ -- 9.12 Positive Energy (III) $e = pc$, $e_0 = 0$ /StPNE pdfmark $e = pc$, $e_0 = 0$ /StBMC pdfmark $e = pc$, $e_0 = 0$ -- 9.13 Negative Energy (IV) $e = -pc$, $e_0 = 0$ /StPNE pdfmark $e = -pc$, $e_0 = 0$ /StBMC pdfmark $e = -pc$, $e_0 = 0$ -- 9.14 Similarity Stretching Solutions of Wave Equation -- 9.15 Some Examples Involving the Dirac Delta Function -- 9.16 Calculation Details for Similarity Solutions -- 9.17 de Broglie's Centrally Symmetric Guidance Formula -- 10 Relation with Quantum Mechanics -- 10.1 Introduction -- 10.2 Quantum Mechanics and Schrödinger Wave Equation -- 10.3 Group Velocity and de Broglie Waves -- 10.4 Lorentz Invariants ps: $\xi = e x - c^2 p t$ /StPNE pdfmark $\xi = e x - c^2 p t$ /StBMC pdfmark $\xi = e x - c^2 p t$ ps: $\eta = p x - e t$ /StPNE pdfmark $\eta = p x - e t$ /StBMC pdfmark $\eta = p x - e t$ ps: $\eta = p x - e t$ /StPNE pdfmark $\eta = p x - e t$ /StBMC pdfmark $\eta = p x - e t$ -- 10.5 Klein-Gordon Partial Differential Equation -- 10.6 Alternative Klein-Gordon-Schrödinger Equation -- 10.7 General Wave Structure of Solutions of Wave Equation -- 10.8 Wave Solutions of Klein-Gordon Equation -- 10.9 Time-Dependent Dirac Equation for Free Particle -- 11 Coordinate Transformations, Tensors and General Relativity -- 11.1 Summation Convention and Cartesian Tensors -- 11.2 Alternative Derivation of Basic Identity -- 11.3 General Curvilinear Coordinates -- 11.4 Partial Covariant Differentiation -- 11.5 Illustration for Single Space Dimension. 11.6 Formulae for Ricci and Einstein Tensors.
