

1. Record Nr.	UNISA996499870603316
Titolo	Elements of dynamical systems : lecture notes from NCM School // Anima Nagar, Riddhi Shah, Shrihari Sridharan, editors
Pubbl/distr/stampa	Singapore : , : Springer, , [2022] ©2022
ISBN	981-16-7962-2
Descrizione fisica	1 online resource (190 pages)
Collana	Texts and readings in mathematics ; ; Volume 79
Disciplina	515.352
Soggetti	Differentiable dynamical systems Sistemes dinàmics diferenciables Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Preface -- Contents -- Real Dynamics -- 1 Introduction and Preliminaries from Topological Dynamics -- 1.1 Introduction -- 1.2 Preliminaries -- 2 Attracting Fixed Point -- 2.1 Banach's Contraction Mapping Theorem -- 2.2 Various Versions of Attraction -- 2.3 Examples -- 3 Topological Transitivity -- 3.1 Five Views of Topological Transitivity -- 3.2 Five Proofs of Topological Transitivity of the Tent Map -- 4 Three Ingredients of Chaos -- 4.1 T, DP and SDIC -- 4.2 T, DP & NOT SDIC -- 4.3 T, NOT DP & SDIC -- 4.4 T, NOT DP & NOT SDIC -- 4.5 NOT T, DP & SDIC -- 4.6 NOT T, DP & NOT SDIC -- 4.7 NOT T, NOT DP & SDIC -- 4.8 NOT T, NOT DP & NOT SDIC -- 5 Chaos For Interval Maps -- 5.1 For Interval Maps Transitivity Implies Chaos -- 5.2 T & DP -3mu SDIC -- 6 Some Consequences of Intermediate Value Theorem in Dynamics -- 6.1 Immediate Applications -- 6.2 Sarkovskii's Theorem: A Statement -- 6.3 Digraphs of Cycles -- 6.4 Use of digraphs in the proof of Sarkovskii's theorem -- 6.5 Doubling periods -- 6.6 Use of doubling periods in the converse of Sarkovskii's Theorem -- 7 Proofs of Some Theorems Used -- 8 Notes & Exercises -- References -- Topological Dynamics -- 1 G-Spaces -- 2 Minimal Systems -- 3 Multiple Recurrence and Van Der Waerden's Theorem -- 4 Enveloping Semigroups -- 5 Proximal and Distal -- 6 Topological Transitivity and

Mixing -- 7 Summary -- References -- Basic Ergodic Theory -- 1
Introduction -- 2 Measure Theoretic Preliminaries -- 2.1 Measurable
Functions and Transformations -- 2.2 Hausdorff Measures -- 3
Recurrence and Ergodic Theorems -- 3.1 Recurrence -- 3.2 Birkhoff
Ergodic Theorem and the Notion of Ergodicity -- 4 Geodesic Flows on
Closed Surfaces -- 4.1 Isometries and Geodesics of \mathbb{H}^2 -- 4.2
Hopf's Proof of Ergodicity -- References -- Symbolic Dynamics -- 1
Introduction.
2 Basic Concepts -- 3 Entropy -- 4 Computations of Entropy -- 4.1
Entropy of Shifts -- 4.2 Entropy of Translations -- 5 Tilings -- 6 3-Dot
Shifts -- References -- Complex Dynamics -- 1 Introduction -- 2 Some
Preliminaries from Complex Analysis and Motivation -- 3 Normal
Families and Dichotomy of \mathbb{P}^1 -- 4 Rational Maps with Empty
Fatou Set -- 5 Some Properties of the Julia Set -- 6 Local Analysis Near
a Fixed Point -- 7 Brolin's Theorem -- 8 What Happens in Higher
Dimensions? -- References -- Topics in Homogeneous Dynamics and
Number Theory -- 1 Introduction -- 1.1 Homogeneous Dynamics --
1.2 Diophantine Approximation -- 2 On the Distribution of
Approximates -- 2.1 The EST Distribution -- 2.2 Spiraling of
Approximates -- 3 Diophantine Approximation in Number Fields -- 4
A Projective Duffin Schaeffer Theorem -- 5 The Hyperbolic Picture --
References -- On Certain Unusual Large Subsets Arising as Winning
Sets of Some Games -- 1 Introduction -- 2 Schmidt's $(,)$ -Game -- 3
Largeness of Winning Sets -- 4 Large Sets Involved in Diophantine
Approximation -- 5 Large Sets in Geometry and Dynamics -- 5.1
Winning Sets in \mathbb{R}^d -- 5.2 Toral Automorphisms -- 5.3
Hyperbolic Geometry -- 6 Further Generalisations and Applications --
6.1 Strong and Absolute Winning Sets -- 6.2 Winning Sets on Lie
Groups -- 6.3 Badly Approximable Numbers in Closed Subsets --
References.
