

1. Record Nr.	UNISA996499870903316
Autore	Zalduendo Ignacio
Titolo	Calculus off the beaten path : a journey through its fundamental ideas / / Ignacio Zalduendo
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	9783031157653 9783031157646
Descrizione fisica	1 online resource (225 pages)
Collana	Springer undergraduate mathematics series
Disciplina	515
Soggetti	Calculus Càlcul Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Contents -- Introduction -- 2400 Years of Calculus -- Calculus and Education -- 1 The Real Numbers -- The Rational Line -- Density of Q -- Some Basic Notions -- Irrationality of Q -- From Eudoxus to Dedekind -- The Real Line -- Dyadic Series-A Construction of R -- The Scarcity of Q -- The Completeness of R -- Cardinality -- Exercises -- 2 Sequences and Series -- Sequences -- Limits of Sequences -- Cantor's Nested Intervals Theorem -- Subsequences -- Series -- The Harmonic Series -- Series of Positive Terms -- Series with Positive and Negative Terms -- The Riemann Series Theorem -- Absolute and Unconditional Convergence -- Exercises -- 3 Functions -- The Elementary Functions -- Polynomials -- Circular Functions -- The Exponential Function: Bernoulli's Inequality -- Irrationality of e -- Convergence of $\sum_{k=1}^{\infty} (1+ak)$ and of $\sum_{k=1}^{\infty} ak$ -- Hyperbolic Functions -- Injectivity and Inverse Functions -- Curves in the Plane: Parametrized Curves -- The Cycloid -- Pythagorean Triples -- Continuity -- Bolzano and Weierstrass -- Limits -- Limits in Ancient Greece: The Area of a Circle -- Three Important Limits -- Exercises -- 4 The Derivative -- Derivative -- Tangents -- Newton-Raphson -- Derivatives of the Elementary Functions -- The Chain Rule -- Derivative

of the Inverse Function -- The Derivative of a Parametrized Curve --  
First Derivative, Tangent Line, and Growth -- The Mean Value  
Theorems -- L'Hôpital's Rule -- Snell's Law -- The Brachistochrone --  
Exercises -- 5 The Integral -- Measure and Integral -- The  
Fundamental Theorem of Calculus -- A Pause for Comments --  
Buffon's Needle -- Irrationality of  $e$  -- Improper Integrals --  
Integration and Sums: Linearity of the Integral -- Uniform  
Convergence-The Weierstrass M-Test -- Gregory's Series --  
Integration and Products: Integration by Parts -- Stirling's Formula.  
Integration and Composition: Integration by Substitution -- A Note on  
Notation -- Length of Curves. The Catenary -- Area Enclosed by a  
Simple Closed Curve -- Exercises -- 6 More Derivatives -- Second  
Derivative, Best-Fitting Parabola, and Curvature -- The Taylor  
Polynomial of Order Two -- Curvature -- Random Walk and the Gauss  
Curve -- The Taylor Series -- Exercises -- 7 Convexity and the  
Isoperimetric Inequality -- The Arithmetic-Geometric Inequality --  
Convexity -- Young, Hölder, Jensen, Cauchy-Schwarz... -- The  
Isoperimetric Inequality -- Exercises -- 8 More Integrals -- Volume --  
Double Integrals -- The Basel Problem -- Solids of Revolution --  
Integration of  $e$  -- Density Functions, Barycenter, and Expectation --  
Center of Mass or Barycenter -- Pappus' Theorem -- The Method --  
Surface Area -- Normal Distribution. Gauss, Laplace, and Stirling --  
Exercises -- 9 The Gamma Function -- The Gamma Function --  
Weierstrass' Formula -- Growth of the Harmonic Series, Again --  
Exercises -- Bibliography -- Index.
