

1. Record Nr.	UNISA996503549903316
Titolo	Combinatorial and additive number theory V : CANT, New York, USA 2021 // edited by Melvyn B. Nathanson
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	9783031107962 9783031107955
Descrizione fisica	1 online resource (290 pages)
Collana	Springer Proceedings in Mathematics and Statistics ; ; v.395
Disciplina	069
Soggetti	Algebra Teoria de nombres Congressos Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Preface: Mathematics in the Time of COVID -- Contents -- On the Number of Dot Product Chains in Finite Fields and Rings -- 1 Introduction -- Background -- Notation -- Main Results -- Sharpness and Relevance of Hypotheses -- 2 Bounds on 3-Chains in $\mathbb{F}_q$ -- 3 Bounds on $k$ -Chains in $\mathbb{Z}_q$ -- 4 Bounds on $k$ -chains in $\mathbb{F}_q$ -- 5 Small Set Results -- Proof of Theorem 4 -- Erratum -- References -- Completeness of Positive Linear Recurrence Sequences -- 1 Introduction -- 2 Modifying Sequences -- Maximal Complete Sequence -- Modifications of Sequences of Arbitrary Coefficients -- 3 Families of Sequences -- Using 1s and 0s as Initial Coefficients -- The " $2L-1$ Conjecture" -- 4 An Analytical Approach -- An Introduction to Principal Roots -- Applications to Completeness -- Denseness of Incomplete Roots -- 5 Open Questions -- 6 Brown's Criterion and a Corollary -- 7 Lemmas for Sect.2 -- 8 Lemmas for Sect.3 -- 9 Lemmas for Sect.4 -- References -- Length Density and Numerical Semigroups -- 1 Introduction -- 2 Background -- 3 Asymptotics and Computation -- 4 Families of Numerical Semigroups -- Supersymmetric Numerical Semigroups -- Embedding Dimension 3 Numerical Semigroups --

Maximal Embedding Dimension Numerical Semigroups -- 5 Tasty and Bland Gluings of Numerical Semigroups -- References -- On a Problem of Cilleruelo and Nathanson, II -- 1 Introduction -- 2 Proof of Theorem 1 -- 3 Proof of Theorem 2 -- References -- Linked Partition Ideals and a Schur-Type Identity of Andrews -- 1 Introduction -- 2 Linked Partition Ideals and a Matrix Equation -- 3 q-Borel Operators -- 4 Non-standard Generating Function -- 5 Theorem 1 -- 6 The Continuous q-Hermite Polynomials -- References -- Semi-magic Matrices for Dihedral Groups -- 1 Introduction -- 2 Definitions and Notations -- 3 Structure of  $D_{2n}$  -- 4 Irreducible Types for . 5 The Intertwining Operator -- 6 Semi-magic Matrices -- 7 Semi-magic Squares for  $MM(D_{2n})$  -- 8 Alternative Counting Formulas -- 9 Orthogonal Idempotents for  $MM(D_{2n})$  -- 10 Quaternionic Bases -- References -- Is the Syracuse Falling Time Bounded by 12? -- 1 Introduction -- 2 Falling Time Records -- Integers Satisfying  $39 \cdot 42 \cdot 613A \cdot 45 \cdot 47 \cdot 603A \cdot f(n) >$  -- 14 -- Glide Records -- Falling Time Distribution -- A Variant of Jumps -- 3 The Syracuse Version -- Current Maximum -- A Variant of Syracuse Jumps -- 4 The Case  $2\ell-1$  -- 5 For Very Large  $n$  -- Heuristics -- A Challenge -- References -- Genera of Numerical Semigroups and Polynomial Identities for Degrees of Syzygies -- 1 Introduction -- 2 Polynomial Identities for Numerical Semigroups -- Polynomial Identities of Arbitrary Degree -- Derivatives  $(r)z=1$ ,  $(r)z=1$  and  $(r)z=1$  -- 3 Linear Equations for Alternating Power Sums  $\mathbb{C}k(S_m)$  -- 4 Algebraic Equations for  $K_r$  in Numerical Semigroups -- Numerical Semigroups  $S_3$  -- 5 Supplementary Relations for  $K_r$  and  $G_r$  in Symmetric Semigroups -- Symmetric (Not CI) Numerical Semigroups  $S_4$  -- Supplementary Relations for  $K_r$  and  $G_r$  in Symmetric CI Semigroups -- 6 Concluding Remarks -- References --  $L_p$  Estimates for Bilinear Generalized Radon Transforms in the Plane -- 1 Introduction -- 2 A General Class of Bilinear Generalized Radon Transforms -- 3 Sharpness Examples -- 4 Summary of Sharpness Conditions and Vertices of  $Q(B)$  -- 5 Trivial Bounds -- 6 The  $L_{3,2} \times L_{3,2}$  to  $L_1$  Estimate for the Model Operators -- 7 The  $L_{2,1} \times L_{2,1}$  to  $L_2$  Estimate for the Model Operators,  $0 < \ell < \infty$  -- 8 The  $L_{3,2} \times L_{3,2}$  to  $L_1$  Estimate for General Operators -- 9 The  $L_{2,1} \times L_{2,1}$  to  $L_2$  Estimate for General Operators -- 10 Comparison with Loomis-Whitney Conditions -- References -- Expansion, Divisibility and Parity: An Explanation -- 1 Introduction -- 2 A First Attempt. 3 Graphs, Operators and Eigenvalues -- 4 Main Part of the Proof: Counting Closed Walks -- 5 Conclusions -- References -- Sums of Squares: Methods for Proving Identity Families -- 1 Motivation -- 2 Examples -- 3 Main Theorem: Statement and Proof Outline -- 4 The Seven Coefficient Groups -- 5 Detailed Outline of Proof -- 6 The Five Summands -- 7 Index Tables for Summand-I Through Summand-V -- 8 Distribution of  $N_{i,j}$  Across Index Sets -- 9 Conclusion -- References -- Generalized Bernoulli Numbers, Cotangent Power Sums, and Higher-Order Arctangent Numbers -- 1 Introduction -- 2 Proofs -- References -- A New Class of Minimal Asymptotic Bases -- 1  $\mathcal{G}$ -Adic Asymptotic Bases -- 2 Minimal Asymptotic Bases -- 3 Open Problems -- References -- An Inverse Problem for Finite Sidon Sets -- 1 Sidon Sets for Linear Forms -- 2 Monic Forms and Normalized Sets -- 3 Binary Linear Forms -- 4 Sidon Sets for Linear Forms in  $h^2$  Variables -- 5 Open Problems -- References.
