Soggetti	Nursing Education, Nursing Nursing Research Holistic Nursing Hospice and Palliative Care Nursing MEDICAL / Clinical Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Frontmatter -- Preface -- Contents -- List of Contributors -- 1 Parents experiences in Slovenia during the COVID-19 pandemic -- 2 Symptoms experienced by patients with acute myocardial infarction that the triage nurses should know in the emergency department: a systematic review -- 3 Mental well-being of parents of children with autism spectrum disorder in Slovenia -- 4 The relationship between perceptions of caring relationships, person-centred climate, and medication administration in nursing: a mixed-methods study -- 5 Pain monitoring analysis as a quality indicator: a retrospective study -- 6 Mobile phone apps' support for people with mild dementia: a systematic review -- 7 Ethical issues in palliative care and end-of-life care experienced by nursing staff within nursing homes: a cross-sectional study -- 8 Elements of person-centred care of older people in primary healthcare: a systematic literature review with thematic analysis -- 9 Triage of patients with acute coronary syndrome at the emergency department: a retrospective study -- 10 Palliative care for patients with heart failure: a cross-sectional study among nursing healthcare

professionals -- 11 The role and meaning of spirituality in older people living with dementia: a systematic review of qualitative studies -- 12 Measuring the Caritas processes: Slovenian versions of the caring factor survey -- 13 Fit for practice: assessing faculty nurse caring behaviours -- 14 Young people's decision to study nursing -- 15 Running a confirmatory factor analysis in R: a step-by-step tutorial -- Index

Sommario/riassunto

Higher life expectancy on a global level requires complex nursing care as poor education and a lack of knowledge can lead to mistakes. There is a need for nurses who can provide high quality and advanced nursing practice. A mix of well-grounded education and innovative research is needed, where the first provides an understanding of best nursing practice care delivery and the second helps nurses determine best practices and improve nursing care.
