

1. Record Nr.	UNISA996511863103316
Autore	Ban Dubravka
Titolo	P-adic banach space representations : with applications to principal series // Dubravka Ban
Pubbl/distr/stampa	Cham, Switzerland : , : Springer Nature Switzerland AG, , [2022] ©2022
ISBN	9783031226847 9783031226830
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (219 pages)
Collana	Lecture Notes in Mathematics, , 1617-9692 ; ; 2325
Disciplina	515.732
Soggetti	Banach spaces p-adic analysis Espaces de Banach Anàlisi p-àdica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Contents -- 1 Introduction -- 1.1 Admissible Banach Space Representations -- 1.2 Principal Series Representations -- 1.3 Some Questions and Further Reading -- 1.4 Prerequisites -- 1.5 Notation -- 1.6 Groups -- Part I Banach Space Representations of p-adic Lie Groups -- 2 Iwasawa Algebras -- 2.1 Projective Limits -- 2.1.1 Universal Property of Projective Limits -- 2.1.2 Projective Limit Topology -- Cofinal Subsystem -- Morphisms of Inverse Systems -- 2.2 Projective Limits of Topological Groups and $\mathfrak{o}K$ -Modules -- 2.2.1 Profinite Groups -- Topology on Profinite Groups -- 2.3 Iwasawa Rings -- 2.3.1 Linear-Topological $\mathfrak{o}K$ -Modules -- Definition of Iwasawa Algebra -- Fundamental System of Neighborhoods of Zero -- Embedding $\mathfrak{o}K[G_0]$, G_0 , and $\mathfrak{o}K$ into $\mathfrak{o}K[[G_0]]$ -- 2.3.2 Another Projective Limit Realization of $\mathfrak{o}K[[G_0]]$ -- 2.3.3 Some Properties of Iwasawa Algebras -- Zero Divisors -- Augmentation Map -- Iwasawa Algebra of a Subgroup -- 3 Distributions -- 3.1 Locally Convex Vector Spaces -- 3.1.1 Banach Spaces -- 3.1.2 Continuous Linear Operators -- 3.1.3 Examples of Banach Spaces -- Banach Space of Bounded

Functions -- Continuous Functions on G_0 -- Mahler Expansion --
 3.1.4 Double Duals of a Banach Space -- 3.2 Distributions -- 3.2.1 The
 Weak Topology on $\mathcal{D}'(G_0, \mathfrak{o}_K)$ -- 3.2.2 Distributions and Iwasawa Rings
 -- 3.2.3 The Canonical Pairing -- 3.3 The Bounded-Weak Topology --
 3.3.1 The Bounded-Weak Topology is Strictly Finer than the Weak
 Topology -- The Weak Topology on V' -- The Bounded-Weak Topology
 on V' -- 3.4 Locally Convex Topology on $K[[G_0]]$ -- 3.4.1 The Canonical
 Pairing -- 3.4.2 p -adic Haar Measure -- 3.4.3 The Ring Structure on $\mathcal{D}'(G_0, K)$ -- A Big Projective Limit -- 4 Banach Space Representations --
 4.1 p -adic Lie Groups -- 4.2 Linear Operators on Banach Spaces --
 4.2.1 Spherically Complete Spaces.
 4.2.2 Some Fundamental Theorems in Functional Analysis -- 4.2.3
 Banach Space Representations: Definition and Basic Properties -- 4.3
 Schneider-Teitelbaum Duality -- 4.3.1 Schikhof's Duality -- 4.3.2
 Duality for Banach Space Representations: Iwasawa Modules -- $K[[G_0]]$ -
 module structure on V' -- 4.4 Admissible Banach Space
 Representations -- 4.4.1 Locally Analytic Vectors: Representations in
 Characteristic p -- Locally Analytic Vectors -- Unitary Representations
 and Reduction Modulo \mathfrak{p}_K -- 4.4.2 Duality for p -adic Lie Groups -- Part
 II Principal Series Representations of Reductive Groups -- Notation in
 Part II -- 5 Reductive Groups -- 5.1 Linear Algebraic Groups -- 5.1.1
 Basic Properties of Linear Algebraic Groups -- More Examples of Linear
 Algebraic Groups -- Unipotent Subgroups -- Identity Component --
 Tori -- 5.1.2 Lie Algebra of an Algebraic Group -- Lie Algebras -- Lie
 Algebra of an Algebraic Group -- 5.2 Reductive Groups Over
 Algebraically Closed Fields -- 5.2.1 Rational Characters -- 5.2.2 Roots
 of a Reductive Group -- Weyl Group -- Abstract Root Systems --
 Simple Roots -- 5.2.3 Classification of Irreducible Root Systems --
 5.2.4 Classification of Reductive Groups -- Cocharacters -- Root
 Datum of a Reductive Group -- Abstract Root Datum -- 5.2.5 Structure
 of Reductive Groups -- Root Subgroups -- Borel Subgroups and
 Parabolic Subgroups -- 5.3 F -Reductive Groups -- 5.4 Z -Groups --
 5.4.1 Algebraic R -Groups -- 5.4.2 Split Z -Groups -- Root Subgroups
 -- 5.5 The Structure of $G(L)$ -- 5.5.1 \mathfrak{o}_L -Points of Algebraic Z -Groups
 -- 5.5.2 \mathfrak{o}_L -Points of Split Z -Groups -- 5.5.3 Coset Representatives for
 G/P -- 5.6 General Linear Groups -- 6 Algebraic and Smooth
 Representations -- 6.1 Algebraic Representations -- 6.1.1 Definition
 and Basic Properties -- 6.1.2 Classification of Simple Modules of
 Reductive Groups -- Abstract Weights -- Weights of a Reductive Group.
 Dominant Bases of $X(T)$ -- Weights of a Module -- Algebraic Induction
 -- Simple Modules -- 6.2 Smooth Representations -- 6.2.1 Absolute
 Value -- 6.2.2 Smooth Representations and Characters -- 6.2.3 Basic
 Properties -- Isomorphic Fields -- Absolutely Irreducible
 Representations -- Contragredient -- Tensor Product of
 Representations -- 6.2.4 Admissible-Smooth Representations -- 6.2.5
 Smooth Principal Series -- Normalized Induction -- Composition
 Factors of Principal Series -- 6.2.6 Smooth Principal Series of $GL_2(L)$
 and $SL_2(L)$ -- 7 Continuous Principal Series -- 7.1 Continuous Principal
 Series Are Banach -- 7.1.1 Direct Sum Decomposition of $\text{Ind}_P^G \mathfrak{o}_G(0-1)$
 -- 7.1.2 Unitary Principal Series -- 7.1.3 Algebraic and Smooth Vectors
 -- Algebraic Characters -- Smooth Characters -- 7.1.4 Unitary
 Principal Series of $GL_2(\mathbb{Q}_p)$ -- 7.2 Duals of Principal Series -- 7.2.1
 Module $M_0()$ -- 7.3 Projective Limit Realization of $M_0()$ -- 7.4 Direct
 Sum Decomposition of $M()$ -- 7.4.1 The Case $G_0 = GL_2(\mathbb{Z}_p)$ -- 7.4.2
 General Case -- 8 Intertwining Operators -- 8.1 Invariant Distributions
 -- 8.1.1 Invariant Distributions on Vector Groups -- 8.1.2 "Partially
 Invariant" Distributions on Unipotent Groups -- 8.1.3 T_0 -Equivariant
 Distributions on Unipotent Groups -- 8.2 Intertwining Algebra -- 8.2.1

Ordinary Representations of $GL_2(\mathbb{Q}_p)$ -- 8.3 Finite Dimensional G_0 -Invariant Subspaces -- 8.3.1 Induction from the Trivial Character: Intertwiners -- 8.4 Reducibility of Principal Series -- 8.4.1 Locally Analytic Vectors -- Reducibility Question for $G(\mathbb{Q}_p)$ -- Reducibility Question for $G(L)$ -- 8.4.2 A Criterion for Irreducibility -- A Nonarchimedean Fields and Spaces -- A.1 Ultrametric Spaces -- A.2 Nonarchimedean Local Fields -- A.2.1 p -Adic Numbers -- A.2.2 Finite Extensions of \mathbb{Q}_p -- A.2.3 Algebraic Closure \mathbb{Q}_p -- A.3 Normed Vector Spaces -- B Affine and Projective Varieties. B.1 Affine Varieties -- B.1.1 Zariski Topology on Affine Space -- B.1.2 Morphisms and Products of Affine Varieties -- B.2 Projective Varieties -- References -- Index.

Sommario/riassunto

This book systematically develops the theory of continuous representations on p -adic Banach spaces. Its purpose is to lay the foundations of the representation theory of reductive p -adic groups on p -adic Banach spaces, explain the duality theory of Schneider and Teitelbaum, and demonstrate its applications to continuous principal series. Written to be accessible to graduate students, the book gives a comprehensive introduction to the necessary tools, including Iwasawa algebras, p -adic measures and distributions, p -adic functional analysis, reductive groups, and smooth and algebraic representations. Part 1 culminates with the duality between Banach space representations and Iwasawa modules. This duality is applied in Part 2 for studying the intertwining operators and reducibility of the continuous principal series on p -adic Banach spaces. This monograph is intended to serve both as a reference book and as an introductory text for graduate students and researchers entering the area.
