1. **Record Nr.**          UNISA996511870503316

   **Titolo**              Web and Big Data . Part I : 6th International Joint Conference, APWeb-WAIM 2022, Nanjing, China, November 25-27, 2022, Proceedings / / Bohan Li [and five others] (editors)

   **Pubbl/distr/stampa**  Cham, Switzerland : , : Springer, , [2023]
                           ©2023

   **ISBN**                3-031-25158-X

   **Edizione**            [First edition.]

   **Descrizione fisica**  1 online resource (589 pages)

   **Collana**             Lecture Notes in Computer Science Series ; ; Volume 13421

   **Disciplina**          005.1

   **Soggetti**            Application software - Development
                           Big data
                           Computer networks - Access control
                           Computer networks - Management
                           Database management
                           World Wide Web - Technological innovations

   **Lingua di pubblicazione**  Inglese

   **Formato**             Materiale a stampa

   **Livello bibliografico**  Monografia

   **Note generali**       Includes index.

   **Nota di contenuto**   Research tracks. Big Data Analytic and Management -- Advanced database and web applications -- Cloud Computing and Crowdsourcing -- Data Mining -- Graph Data and Social Networks -- Information Extraction and Retrieval -- Knowledge Graph -- Machine Learning -- Query processing and optimization -- Recommender Systems -- Security, privacy, and trust& Blockchain data management and applications -- Spatial and multi-media data -- Demo papers.

   **Sommario/riassunto**  This three-volume set, LNCS 13421, 13422 and 13423, constitutes the thoroughly refereed proceedings of the 6th International Joint Conference, APWeb-WAIM 2022, held in Nanjing, China, in August 2022. The 75 full papers presented together with 45 short papers, and 5 demonstration papers were carefully reviewed and selected from 297 submissions. The papers are organized around the following topics: Big Data Analytic and Management, Advanced database and web applications, Cloud Computing and Crowdsourcing, Data Mining, Graph Data and Social Networks, Information Extraction and Retrieval,

Knowledge Graph, Machine Learning, Query processing and optimization, Recommender Systems, Security, privacy, and trust and Blockchain data management and applications, and Spatial and multi-media data.
