Sommario/riassunto	As a genre situated at the crossroad of rhetoric and fiction, declamation offers the freedom to experiment with new forms of discourse. Placing

the literariness of declamatio into the spotlight, this volume showcases declamation as a realm of genuine literary creation with its own theoretical underpinning, literary technique and generic conventions. Focusing on the oeuvre of (Ps)Quintilian, this volume demonstrates that these texts constitute a genre on their own, the rhetorical and literary framework of which remains not yet fully mapped. It is of interest to students and scholars of Rhetoric and Roman Literature.

**Sommario/riassunto**

"In this Dahlem workshop report, scientists from different disciplines-including anthropology, psychology, psychiatry, and behavioral biology-come together to explore the concepts of attachment and bonding from diverse perspectives. In their studies they seek to understand the causes or the consequences of attachment and bonding in general and their different qualities in individual development in particular. They address such questions as biobehavioral processes in attachment and bonding; early social attachment and its influences on later patterns of behavior; bonding later in life; and adaptive and maladaptive (or pathological) outcomes." --Publisher's description.
