Sommario/riassunto	"Thinking with an Accent brings together leading and emerging scholars of media, literature, education, law, linguistics, sound, and

politics to theorize accent as an understudied lynchpin of the global cultural economy. It reframes accent as a powerfully coded and yet unexplored mode of perception-one that, properly harnessed, can yield transformative modalities of knowledge, action, and care. Accent, this anthology shows, does more than denote geographic, ethnic, or social identity. Accent emerges through listening, mobilizes negotiations of power, and enacts desiring relations. To think with an accent is to practice a dialogical and multimodal inquiry that unfolds the tensions of address within mediated utterances"-- Provided by publisher.

Sommario/riassunto

As definitions of masculinity change, how friendships are organized by men is also affected. However, interactions among and between men are not only shaped by gender. This volume offers an analysis of the differences within the genders and the social forces that shape the ways in which friendship is organized. Through different perspectives, the contributors show that a greater variation exists within rather than between the genders. They focus on the diversity in men's friendships and how men develop and maintain friendships with both men and women. Chapters focus
