Sommario/riassunto	<p>This detailed study in religious studies is intended as a contribution to the study of Hinduisms. It reconstructs Hindu temple practices in Zurich and Vienna, representative of two national contexts. The focus is on the question of the practical execution of events in the Hindu temple, i.e. the question of which practices create a temple as such. Committed to an ethnomethodological approach, the study reconstructs the routine of communal Hindu temple practice - the 'doing mandir'. In doing so, it fills a research gap and contributes to the establishment of practice theory approaches in religious studies and their translation into the concretion of empirical research.</p> <p>Die religionswissenschaftliche Detailstudie versteht sich als Beitrag zur Erforschung von Hinduismen. Sie rekonstruiert in Zürich und Wien, stellvertretend für zwei nationalstaatliche Kontexte, hinduistische Tempelpraktiken. Im Zentrum steht die Frage nach dem praktischen Vollzug des Geschehens im Hindutempel, also die Frage danach, welche Praktiken einen Tempel als solchen hervorbringen. Einem ethnomethodologischen Zugang verpflichtet, rekonstruiert die Studie die Routine gemeinschaftlicher hinduistischer Tempelpraxis – das „doing mandir“. Damit füllt sie eine Forschungslücke und leistet einen Beitrag zur Etablierung praxistheoretischer Zugänge in der Religionswissenschaft und ihrer Übersetzung in die Konkretion empirischer Forschung.</p>

Nota di contenuto

Part I: How did we get here? -- Chapter 1: Introduction to Part I -- Chapter 2: Does conventional economics fit reality? -- Chapter 3: The behavioral alternative -- Part II: moving forward: seven businesses to finish -- Chapter 4: Introduction to Part II -- Chapter 5: How many real biases are there? -- Chapter 6: How do people form expectations in the real world?. Chapter 7: Time and preferences -- Chapter 8: Rationality: An inferiority complex? -- Chapter 9: The problem with behavioral finance -- Chapter 10: Should biased nudgers nudge us? -- Chapter 11: What we talk about when we talk about behavioral economics.

Sommario/riassunto

This book sets the agenda to turn behavioral economics, which has long been considered a subordinate discipline, into mainstream economics. Ghisellini and Chang expose the conceptual and empirical inadequacy of conventional economics using illustrations of real world decision-making in a dynamic environment, including evidence from the global financial crisis. With a rigorous yet accessible style, they give a comprehensive overview of behavioral economics and of the current state of play in the field across different schools of thought. Seven major conceptual problems still affecting the development of behavioral economics are identified and the authors propose research avenues to address these issues and allow the discipline to receive its long-awaited recognition. Crucial reading for researchers and students looking for insights into the many unsolved problems of economics.
