1. Record Nr. UNISA996546836703316

Autore	Hirmer Pascal
Titolo	Model-based approaches to the internet of things / / Pascal Hirmer
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2023] ©2023
ISBN	9783031188848 9783031188831
Descrizione fisica	1 online resource (134 pages)
Disciplina	354.81150006
Soggetti	Internet of things
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Preface -- Acknowledgements -- Contents -- About the Author -- Acronyms -- 1 Introduction -- 1.1 Motivation -- 1.2 Structure of the Book -- References -- 2 Foundations -- 2.1 Internet of Things: Introduction and Definitions -- 2.1.1 Communication in the IoT -- 2.1.1.1 Publish-Subscribe vs. Request-Response -- 2.1.2 IoT Communication: Protocols and Technologies -- 2.2 Edge and Fog Computing -- References -- 3 Scenarios and Challenges -- 3.1 Scenario 1: Autonomous Transport Vehicles -- 3.2 Scenario 2: Smart Parking -- 3.3 Challenges -- References -- 4 Life Cycle of an IoT Application -- 4.1 Step 1: Building the Physical IoT Environment -- 4.2 Step 2: Modeling the Communication in the IoT Environment -- 4.3 Step 3: IoT Software Design and Implementation -- 4.4 Step 4: IoT Software Deployment -- 4.5 Step 5: IoT Application Execution and Monitoring -- 4.6 Step 6: IoT Application Adaptation -- 4.7 Step 7: IoT Application Retirement -- 4.8 Summary -- References -- 5 Model Based Approaches to the Internet of Things -- 5.1 Selection of Physical IoT Hardware -- 5.1.1 IoT Toolbox and Building Blocks -- 5.1.2 Building Block Recommendation and Selection -- 5.1.3 Related Work -- 5.2 Modeling the Physical IoT Environment -- 5.2.1 Background -- 5.2.1.1 Internet of Things and Their Environment Models -- 5.2.1.2 Ontology Models -- 5.2.2 Overview of IoT Environment Models -- 5.2.2.1 HomeML -- 5.2.2.2 IEEE 1451.2 -- 5.2.2.3 IoT-Lite -- 5.2.2.4

IoT-Stream Ontology -- 5.2.2.5 IoT Architectural Reference Model (IoT ARM) -- 5.2.2.6 Open Connectivity Foundation (OCF) -- 5.2.2.7 IoT-O -- 5.2.2.8 oneM2M Base Ontology -- 5.2.2.9 OPC UA Information Model -- 5.2.2.10 Sensor Measurement Lists (SenML) -- 5.2.2.11 Sensor Model Language (SensorML) -- 5.2.2.12 SSN Ontology -- 5.2.2.13 Vorto -- 5.2.2.14 Model Categorization -- 5.2.3 Model Comparison.
5.2.3.1 Criterion 202: Maturity (Standard/Non-Standard) -- 5.2.3.2 Criterion 203: Support of Hierarchies -- 5.2.3.3 Criterion 204: Availability and Community Support -- 5.2.3.4 Criterion 205: Implementation -- 5.2.3.5 Criterion 206: Geolocation Support -- 5.2.4 Other Surveys -- 5.2.5 Summary -- 5.3 Setting Up the IoT Environment -- 5.4 Modeling the Communication in the IoT Environment -- 5.4.1 TDLIoT Requirements -- 5.4.2 Topic Description Language for the IoT -- 5.4.2.1 Topic Description -- 5.4.2.2 Topic Provider -- 5.4.2.3 Topic Consumer -- 5.4.2.4 Topic Catalog and REST API -- 5.4.2.5 Prototypical Implementation -- 5.4.3 Related Work -- 5.4.4 Summary -- 5.5 IoT Software Design and Implementation -- 5.5.1 Software Building Blocks -- 5.5.2 Data Processing Model -- 5.6 IoT Software Deployment -- 5.6.1 TOSCA Foundations -- 5.6.2 TOSCA and the Internet of Things -- 5.7 IoT Application Execution and Monitoring -- 5.7.1 Execution and Message Exchange -- 5.8 Monitoring of IoT Applications -- 5.8.1 Generic Agent Templates -- 5.8.2 Related Work -- 5.8.3 Conclusion -- 5.9 IoT Application Adaptation -- 5.9.1 Used Models -- 5.9.1.1 Used IoT Environment Model -- 5.9.2 Lifecycle Method for Seamless Integration of IoT Devices -- 5.9.2.1 Step 1: Server Discovery -- 5.9.2.2 Step 2: Device Registration -- 5.9.2.3 Step 3: Software Determination -- 5.9.2.4 Step 4: Software Deployment and Configuration -- 5.9.2.5 Step 5: Data Processing and Monitoring -- 5.9.2.6 Step 6: Device Removal -- 5.9.3 Related Work -- 5.9.4 Prototype and Discussion -- 5.9.5 Conclusion -- 5.10 IoT Application Retirement -- References -- 6 Discussion -- 6.1 Distribution/Decentralization -- 6.2 Heterogeneity -- 6.3 Robustness/Safety -- 6.4 Privacy -- 6.5 Security -- 6.6 Efficiency/Real-Time Capabilities -- 6.7 Energy Consumption -- References -- 7 Conclusion and Summary.
