	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	First published in 1978.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Cover; Iran; Copyright; Contents; Introduction; Part I: The Creation of Modem Iran; 1. The Coming of the Boom; 2. The Growth of Urban Iran; 3. Oil and the Iranian Economy; 4. Monarchy and the Pahlavi Dynasty; Part II: Cycle of the Boom; 5. The Big Opportunity; 6. Limits to Oil Wealth; 7. Successes and Failures; Part III: The System of Power; 8. Use and Abuse of Power; 9. Control Through Money; 10. Influence of the Military; 11. Problems of Culture; 12. Conclusion; Appendix: Pahlavi Foundation: Known Assets in December 1977
	Sommario/riassunto	The sudden increase of oil prices in 1973 meant that the foreign revenues of Iran quadrupled in just over two months. As the first OPEC member to begin disbursing this extra revenue on a significant scale, Iran offers the first complete example of the social, economic and political problems this caused. This book examines the cycle of the boom and the years that led up to it - from the rural and essentially backward nature of the country to the euphoria of 1973 when the Shah

seriously talked of Iran reaching the Great Civilisation, where by the 1990s Iran would be the world's fifth power.

	Nota di contenuto	Chapter 1. Information Theory on Change to Reflection -- Chapter 2. Recognizing Objective Information. Chapter 3. Modelling Objective Information: Sextuple -- Chapter 4. Measuring Objective Information -- Chapter 5. Exemplifying Objective Information: Air Traffic Control System -- Chapter 6. Exemplifying Objective Information Theory: Smart Court.
	Sommario/riassunto	Objective Information Theory (OIT) is proposed to represent and compute the information in a large-scale complex information system with big data in this monograph. To formally analyze, design, develop, and evaluate the information, OIT interprets the information from essential nature, measures the information from mathematical

properties, and models the information from concept, logic, and physic. As the exemplified applications, Air Traffic Control System (ATCS) and Smart Court SoSs (System of Systems) are introduced for practical OITs. This Open Access book can be used as a technical reference book in the field of information science and also a reference textbook for senior students and graduate ones in related majors.
