1. Record Nr.   UNISA996546849603316

   Titolo   Logic, Language, Information, and Computation : 29th International
                        Workshop, WoLLIC 2023, Halifax, NS, Canada, July 11-14, 2023,
                        Proceedings / / Helle Hvid Hansen, Andre Scedrov, and Ruy J. G. B. de
                        Queiroz, editors

   Pubbl/distr/stampa   Cham, Switzerland : , : Springer Nature Switzerland AG, , [2023]
                        ©2023

   ISBN   3-031-39784-3

   Edizione   [First edition.]

   Descrizione fisica   1 online resource (419 pages)

   Collana   Lecture Notes in Computer Science Series ; ; Volume 13923

   Disciplina   401

   Soggetti   Language and logic
                        Logic, Symbolic and mathematical

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di bibliografia   Includes bibliographical references and index.

   Nota di contenuto   Learning Context-Free Grammars from Positive Data and Membership
                        Queries -- The Web Still Needs Logic and Reasoning: A Short
                        Introduction to SHACL for Logicians -- From Gödel's Incompleteness
                        Theorem to the completeness of bot beliefs -- Quantitative Global
                        Memory -- Effective Skolemization -- Factive Complements are not
                        Always Unique Entities: A Case Study with Bangla 'remember' -- Two-
                        layered logics for paraconsistent probabilities -- An Axiom System for
                        Hybrid Logic with Propositional Quantifiers -- An Evidence Logic
                        Perspective on Schotch-Jennings Forcing -- A separation logic with
                        histories of epistemic actions as resources -- Conditional Obligations
                        in Justification Logic -- Structural Completeness and Superintuitionistic
                        Inquisitive Logics -- Validity in Choice Logics - A Game-theoretic
                        Investigation -- Aleatoric Propositions: Reasoning about Coins --
                        Towards an induction principle for nested data types -- A principled
                        approach to Expectation Maximisation and Latent Dirichlet Allocation
                        using Jeffrey's update rule -- Parameterized Complexity of
                        Propositional Inclusion and Independence Logic -- Parallelism in
                        Realizability Models -- Bisimulations between Verbrugge models and
                        Veltman models -- Focus-style proofs for the two-way alternation-free
                        μ-calculus -- Relevant Reasoning and Implicit Beliefs --

	Decidability of modal logics of non-k-colorable graphs -- Subsumption-Linear Q-Resolution for QBF Theorem Proving -- Maximally Multi-Focused Proofs for Skew Non-Commutative MILL.
Sommario/riassunto	Edited in collaboration with FoLLI, the Association of Logic, Language and Information this book constitutes the refereed proceedings of the of the 29th International Workshop on Logic, Language, Information, and Computation, WoLLIC 2023, held in Halifax, NS, Canada, during July 11–14, 2023. The 24 full papers (21 contributed, 3 invited) included in this book were carefully reviewed and selected from 46 submissions. The book also contains the abstracts for the 7 invited talks and 4 tutorials presented at WoLLIC 2023. The WoLLIC conference series aims at fostering interdisciplinary research in pure and applied logic.
