

1. Record Nr.	UNISA996546859003316
Titolo	International journal of computers in clinical practice
Pubbl/distr/stampa	Hershey, PA : , : IGI Global, , 2016-
ISSN	2470-8534
Disciplina	610.285
Soggetti	Medical informatics Clinical medicine Medical Informatics Applications Clinical Medicine - methods Periodical Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed

2. Record Nr.	UNINA9910383659403321
Titolo	Atlas of Anatomic Hepatic Resection for Hepatocellular Carcinoma : Glissonean Pedicle Approach / / edited by Jiangsheng Huang, Xianling Liu, Jixiong Hu
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2019
ISBN	981-13-0668-0
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (339 pages)
Disciplina	616.99436
Soggetti	Cancer—Treatment Surgery Cancer Therapy General Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Clinical Anatomy of the Liver -- Preoperative Preparation for Patients with Hepatocellular Carcinoma -- Basic Techniques for Hepatic Resection by the Glissonean Approach -- Types of Segments-Oriented Hepatic Resection by the Glissonean Pedicle Approach -- Other Types of Hepatic Resection for HCC.
Sommario/riassunto	This book comprehensively describes the clinical details of anatomic hepatic resection using the Glissonean pedicle approach for hepatocellular carcinoma. It includes all aspects of the surgical anatomy of the liver, preoperative management of patients, surgical techniques, and intraoperative key points to prevent postoperative complications. The first three chapters provide a general introduction to the clinical anatomy of the liver, preoperative management of patients with hepatocellular carcinoma, basic techniques for hepatic resection using the Glissonean approach, and the application of dye staining in anatomic hepatic resection. Subsequent chapters present the technical details of anatomical segmentectomy (Couinaud's classification), sectionectomy and hemi-hepatectomy for hepatocellular carcinoma using the modified suprahilar Glissonean approach. All of these hepatectomies can be performed using simple and easily available

surgical instruments. In addition, it discusses precise transection of the deepest hepatic parenchyma guided by methylene blue staining. It is a useful and timely reference for hepatobiliary surgeons, clinical staff, and medical students.
