Autore	Smith Gilson Caitlin
Titolo	The metaphysical presuppositions of being-in-the-world [[electronic resource]] : a confrontation between St. Thomas Aquinas and Martin Heidegger / / Caitlin Smith Gilson
Pubbl/distr/stampa	New York, : Continuum, c2010
ISBN	1-4411-8014-1 1-282-57683-6 9786612576836 1-4411-2367-9
Descrizione fisica	1 online resource (236 p.)
Disciplina	110
Soggetti	Intentionality (Philosophy) Metaphysics Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [205]-211) and index.
Nota di contenuto	Contents; Preface; Acknowledgments; Chapter 1 The Fourfold Historical Origin of Metaphysics; Chapter 2 St. Thomas Aquinas and Classical Intentionality; Chapter 3 The Fourfold Reversals: The Displacement of Being-in-the-World; Chapter 4 The Fourfold Intensities; Epilogue: The Metaphysics of Tragedy; Notes; Bibliography; Index
Sommario/riassunto	The Metaphysical Presuppositions of Being-in-the-World brings St. Thomas Aquinas and Martin Heidegger into dialogue and argues for the necessity of Christian philosophy. Through the confrontation of Heideggerian and Thomist thought, it offers an original and comprehensive rethinking of the nature of temporality and the origins of metaphysical inquiry. The book is a careful treatment of the inception and deterioration of the four-fold presuppositions of Thomistic metaphysics: intentionality, causality, finitude, ananke stenai. The analysis of the four-fold has never before been done and it is a

Titolo	Signal and information processing, networking and computers : proceedings of the 10th International Conference on Signal and Information Processing, Networking and Computers (ICSINC) / / edited by Yue Wang, [and three others]
Pubbl/distr/stampa	Singapore : , : Springer, , [2023] ©2023
ISBN	981-19-9968-6
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (1257 pages)
Collana	Lecture Notes in Electrical Engineering, , 1876-1119 ; ; 996
Disciplina	354.81150006
Soggetti	Information networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	A New Multi-Instance Learning Algorithm Integrated with TF-IDF for Entity Relation Extraction in Electronic Medical Records -- A Deep Learning Algorithm Using Feature Engineering to Adjust Attention Mechanisms and Neural Network for Cloud Security Detection -- The design and implementation of a ranging system based on the DSSS -- Application of Grey Approximation Ideal Solution Ranking Methods in optimal selection of satellite initial orbits.
Sommario/riassunto	This book collects selected papers from the 10th Conference on Signal and Information Processing, Networking and Computers held in Xi' Ning, China held in July, 2022. The book focuses on the current works of information theory, communication system, computer science, aerospace technologies and big data and other related technologies. People from both academia and industry of this field can contribute and find their interests from the book.

3. Record Nr.	UNINA9910790583703321
Autore	Winfield Richard Dien <1950->
Titolo	Hegel's Science of logic [[electronic resource]] : a critical rethinking in thirty lectures / / Richard Dien Winfield
Pubbl/distr/stampa	Lanham, Md. ; ; Plymouth, England, : Rowman & Littlefield Publishers, c2012
ISBN	1-4422-1936-X
Descrizione fisica	1 online resource (388 p.)
Disciplina	160
Soggetti	Logic
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Preface; 1 General Introduction; 2 The General Concept of Logic; 3 With What Must the Science Begin?; 4 Being, Nothing, and Becoming; 5 From Becoming to Determinate Being; 6 Determinate Being; 7 Something; 8 Finitude; 9 Infinity; 10 Being-for-Self; 11 The One; 12 Quantity; 13 From Measure to Essence; 14 Essence; 15 Essence as Reflection within Itself; 16 From Reflection to Existence; 17 From Appearance to Actuality; 18 Transition to the Concept; 19 The Concept; 20 From Concept to Judgment; 21 Judgment; 22 From Judgment to Syllogism; 23 Syllogism; 24 Objectivity 25 Mechanism, Chemism, Teleology26 From Objectivity to Idea; 27 From Life to Cognition; 28 The Idea of Cognition; 29 Truth and the Good; 30 The Absolute Idea; Works Cited; Notes; Index
Sommario/riassunto	This text provides a truly comprehensive guide to one of the most important and challenging works of modern philosophy. The systematic complexity of Hegel's radical project in the Science of Logic prevents many from understanding and appreciating its value. By independently and critically working through Hegel's argument, this book offers an enlightening aid for study and anchors the Science of Logic at a central position in the philosophical canon.<br /

Livello bibliografico	Monografia
Nota di contenuto	Introduction -- The Bees algorithm -- Empirical study -- Analytical study -- Case study: Robot control optimisation -- Case study: PCB assembly optimisation -- Case study: Multi-solution problems -- Latest developments -- Appendices.
Sommario/riassunto	This book offers an extensive guide to understanding, implementing, and applying the Bees Algorithm, a powerful nature-inspired optimisation metaheuristic that mimics the foraging behaviour of honey bees. In today's highly interconnected world, systems have become more difficult to optimise. This book addresses the challenge of solving

complex optimisation problems efficiently and effectively by drawing inspiration from the remarkable problem-solving abilities observed in nature. The Bees Algorithm provides an elegant, simple, robust, and adaptable approach to navigate the complexities of high-dimensional, multimodal, or time-varying problems that often stymie traditional optimisation methods. This book offers an in-depth exploration of the algorithm, providing a thorough understanding of its underlying principles and mechanisms. It establishes a mathematical framework for the algorithm, facilitating a clearer insight into its behaviour and performance. Through empirical studies and benchmarks, the book demonstrates the algorithm's effectiveness across a range of optimisation problems. Additionally, it showcases practical applications of the Bees Algorithm in diverse fields such as engineering design, robotics, and manufacturing. Finally, it discusses the latest developments and variants of the algorithm, highlighting its potential for future research and innovation. With its accessible style and step-by-step guidance, this book equips readers—be they researchers, practitioners, or students in computer science, engineering, or optimisation—with the knowledge and tools to leverage the principles of swarm intelligence and biomimicry to solve the real-world optimisation challenges of the new industrial age.
