

1. Record Nr.	UNISA996547970003316
Titolo	Digital transformation in policing [[electronic resource]] : the promise, perils and solutions // Reza Montasari, Victoria Carpenter, and Anthony J. Masys, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer Nature Switzerland AG , , [2023] ©2023
ISBN	3-031-09691-6
Edizione	[First edition.]
Descrizione fisica	1 online resource (V, 168 p. 21 illus., 17 illus. in color.)
Collana	Advanced Sciences and Technologies for Security Applications Series
Disciplina	363.20285
Soggetti	Artificial intelligence - Moral and ethical aspects Criminology Police - Data processing Police - Technological innovations Security systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Digitizing Policing: from disruption to innovation through futures thinking and anticipatory innovation -- The Use of Counter Narratives to Combat Violent Extremism Online -- Ethical Challenges in the Use of Digital Technologies: AI and Big Data -- Law Enforcement and the Policing of Cyberspace -- Contemporary Issues in Child Protection: Police Use of Artificial Intelligence for Online Child Protection in the UK -- Beyond the Surface Web: How Criminals Are Utilising the Internet to Commit Crimes -- The Role of the Internet in Radicalisation to Violent Extremism -- Exploring the Extent to Which Extremism and Terrorism Have Changed since the Advent of the Internet -- Zero Trust Security Strategies and Guideline. .
Sommario/riassunto	This book shares essential insights into how the social sciences and technology could foster new advances in managing the complexity inherent to the criminal and digital policing landscape. Said landscape is both dynamic and intricate, emanating as it does from crimes that are both persistent and transnational. Globalization, human and drug trafficking, cybercrime, terrorism, and other forms of transnational

crime can have significant impacts on societies around the world. This necessitates a reassessment of what crime, national security and policing mean. Recent global events such as human and drug trafficking, the COVID-19 pandemic, violent protests, cyber threats and terrorist activities underscore the vulnerabilities of our current security and digital policing posture. This book presents concepts, theories and digital policing applications, offering a comprehensive analysis of current and emerging trends in digital policing. Pursuing an evidence-based approach, it offers an extraordinarily perceptive and detailed view of issues and solutions regarding the crime and digital policing landscape. To this end, it highlights current technological and methodological solutions as well as advances concerning integrated computational and analytical solutions deployed in digital policing. It also provides a comprehensive analysis of the technical, ethical, legal, privacy and civil liberty challenges stemming from the aforementioned advances in the field of digital policing; and accordingly, offers detailed recommendations supporting the design and implementation of best practices including technical, ethical and legal approaches when conducting digital policing. The research gathered here fits well into the larger body of work on various aspects of AI, cybersecurity, national security, digital forensics, cyberterrorism, ethics, human rights, cybercrime and law. It provides a valuable reference for law enforcement, policymakers, cybersecurity experts, digital forensic practitioners, researchers, graduates and advanced undergraduates, and other stakeholders with an interest in counter-terrorism. In addition to this target audience, it offers a valuable tool for lawyers, criminologist and technology enthusiasts.
