Collana	Beitra"ge zur Pa"dagogik, 11
Disciplina	610.711
Soggetti	Teaching - methods
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Stories bring up what gets lost in the confusion of teaching. These stories are crucial for professional ac-tion in the classroom. Didactics in Pieces shows how working on and with stories can create units of meaning so that the uncer-tainty of teaching is used as an occasion for reflection. Didactics in Pieces shows how didactic knowledge can be developed from narrative texts. Didactics in Pieces is therefore mainly concerned with the how and less with the why of didactic teaching. In this sense, Didaktik in Stu"cken is an inductive teaching of didactics and a toolbox for working with narrative texts.
