

1. Record Nr.	UNISA996551158903316
Titolo	1849-2023 - IEEE Standard for eXtensible Event Stream (XES) for Achieving Interoperability in Event Logs and Event Streams // IEEE
Pubbl/distr/stampa	New York, USA : , : IEEE, , 2023
ISBN	1-5044-9805-4
Descrizione fisica	1 online resource (55 pages)
Disciplina	658.1
Soggetti	System analysis - Computer programs
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A grammar for a tag-based language whose aim is to provide designers of information systems with a unified and extensible methodology for capturing systems' behaviors by means of event logs and event streams is defined in the XES standard. An "XML Schema" describing the structure of an XES event log-stream and an "XML Schema" describing the structure of an extension of such a log-stream are included in this standard. Moreover, a basic collection of so-called "XES extension" prototypes that provide semantics to certain attributes as recorded in the event log-stream is included in this standard.
