Sommario/riassunto	The Victorian Soldier in Africa re-examines the campaign experience of British soldiers in Africa during the period, 1874--1902-the zenith of the Victorian imperial expansion-and does so from the perspective of the regimental soldier. The book utilises an unprecedented number of letters and diaries, written by regimental officers and other ranks, to allow soldiers to speak for themselves about their experience of colonial warfare. The sources demonstrate the adaptability of the British army in fighting in different climates, over demanding terrain and against a diverse array of enemies. They also uncover soldiers' responses to army reforms of the era as well as the response to the introduction of new technologies of war. Moreover, the book provides commentary on soldiers' views of commanding officers and politicians alongside assessment of war correspondents, colonial auxiliaries and African natives in their roles as bearers, allies and enemies. This book reveals new insights on imperial and racial attitudes within the army, on relations between soldiers and the media and the production of information and knowledge from frontline to homefront. It will make

fascinating reading for students, academics and enthusiasts in imperial history, Victorian studies, military history and colonial warfare.
