| Sommario/riassunto      | Offering the first comprehensive analysis of readmission agreements, this book examines the intersection of immigration and human rights law and the complex interplay between evolving international, regional and national norms. Expanding the current academic and policy discourse on readmission agreements through detailed consideration of the negotiation processes carried out by the European Community, it renders a nuanced review of the underlying strategic objectives and regional effects of these treaties. The book makes a robust challenge to prevailing perspectives in legal scholarship and policy on readmission and refugee protection. The self-contained focus on EC readmission |

agreements throws light on broader questions of EU migration policy and reveals a detailed and insightful picture of a specific field of EU policy and action.

**Sommario/riassunto**

This volume provides a novel platform to re-evaluate the notion of

open-ended intimacies through the lens of affect theories. Contributors address the embodied, affective and psychic, sensorial and embodied aspects of their ongoing intimate entanglements across various timely phenomena. This fascinating collection asks how the study of affect enables us to rethink intimacies, what affect theories can do to the prevailing notion of intimacy and how they renew and enrich theories of intimacy in a manner which also considers its normative and violent forms. This collection brings together a selection of original chapters which invite readers to rethink such concepts as care, closeness and connectivity through the notion of affective intimacies. Based on rigorous research, it offers novel insights on a variety of themes from austerity culture to online discussions on regretting motherhood, from anti-ableist notions of health to teletherapies in the era of COVID-19, and from queer intimacies to critiques of empathy. Lively and thought-provoking, this collection contributes to timely topics across the social sciences, representing multiple disciplines from gender studies, sociology and cultural studies to anthropology and queer studies. By so doing, it advances the value of interdisciplinary perspectives and creative methodologies for understanding affective intimacies.
