

1. Record Nr.	UNISA996565870503316
Autore	Calvo Hiram
Titolo	Advances in Computational Intelligence [[electronic resource] ] : 22nd Mexican International Conference on Artificial Intelligence, MICAI 2023, Yucatán, Mexico, November 13–18, 2023, Proceedings, Part I // edited by Hiram Calvo, Lourdes Martínez-Villaseñor, Hiram Ponce
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	3-031-47765-0
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (363 pages)
Collana	Lecture Notes in Artificial Intelligence, , 2945-9141 ; ; 14391
Altri autori (Persone)	Martínez-VillaseñorLourdes PonceHiram
Disciplina	006.3
Soggetti	Artificial intelligence Computers Database management Application software Artificial Intelligence Computing Milieux Database Management System Computer and Information Systems Applications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- Contents - Part I -- Contents - Part II -- Machine Learning -- Stock Market Performance Analytics Using XGBoost -- 1 Introduction -- 2 Related Work -- 3 Methodology and Development -- 3.1 Dataset Description -- 3.2 Data Preparation -- 3.3 Using XGBoost for Stock Trend and Prices Prediction -- 3.4 Moving Average -- 4 Results and Discussion -- 4.1 Correlation of Stock -- 4.2 XGBoost Regressor -- 4.3 MACD -- 5 Conclusion -- References -- 1D Quantum Convolutional Neural Network for Time Series Forecasting and Classification -- 1 Introduction -- 2 Preliminaries -- 2.1 Quantum Computation -- 2.2 Quantum Circuits -- 2.3 Variational Quantum Circuits -- 3 1D Quantum Convolution -- 4 Results and Discussion -- 4.1 Time Series Forecasting -- 4.2 Time Series Classification Using PTB Dataset -- 5 Conclusions -- References -- Hand Gesture Recognition

Applied to the Interaction with Video Games -- 1 Introduction -- 2 Methodology -- 2.1 Hand Gesture Recognition -- 2.2 Video Game Application -- 3 Results -- 4 Conclusions and Future Work -- References -- Multiresolution Controller Based on Window Function Networks for a Quanser Helicopter -- 1 Introduction -- 2 Application of the Control Scheme to the Helicopter Model -- 2.1 Dynamic Identification -- 2.2 Proportional Multi-resolution Controller -- 2.3 Autotune of the Gains -- 3 Results -- 3.1 Open-Loop Simulation Results: Identification Process -- 3.2 Closed-Loop Simulation Results -- 3.3 Comparative Between PMR and PID Controllers -- 4 Conclusions and Future Work -- References -- Semi-supervised Learning of Non-stationary Acoustic Signals Using Time-Frequency Energy Maps -- 1 Introduction -- 2 Methods -- 2.1 STFT Maps -- 2.2 Dimensionality Reduction Using PCA -- 2.3 Background Subtraction -- 3 Description of Proposed Method -- 4 Acoustic Non-stationary Signals. 4.1 Signals Acquisition -- 5 Classifier Results -- 5.1 Training and Classification -- 6 Conclusion -- References -- Predict Email Success Based on Text Content -- 1 Introduction -- 2 Related Work -- 3 Methodology -- 3.1 Description of the Dataset -- 3.2 Building and Training the Model -- 3.3 Model Evaluation -- 4 Results and Discussion -- 5 Conclusions -- References -- Neural Drone Racer Mentored by Classical Controllers -- 1 Introduction -- 2 Related Work -- 3 Methodology -- 3.1 Neural Pilot -- 3.2 Proportional-Integral Controller -- 3.3 Model Predictive Controller -- 3.4 Active Disturbance Rejection Control -- 3.5 Training Process -- 4 Experimental Framework -- 5 Conclusions -- References -- Eye Control and Motion with Deep Reinforcement Learning: In Virtual and Physical Environments -- 1 Introduction -- 2 Proposed Solution -- 2.1 Deep Reinforcement Learning and the NN's Structure -- 2.2 Optimising the Learning Process -- 3 The Experiment -- 3.1 Optimizing Training with Image Detection -- 3.2 Testing with a Real Camera -- 3.3 Performance Metrics -- 4 Training Results and Discussion -- 4.1 Testing with a Real Camera -- 5 Conclusions -- References -- Fingerspelling Recognition in Mexican Sign Language (LSM) Using Machine Learning -- 1 Introduction -- 2 Related Work -- 3 Methods -- 3.1 Data Capturing -- 3.2 Keypoints Detection -- 3.3 Keypoints Processing -- 3.4 Classification -- 4 Results -- 5 Conclusions -- References -- Load Demand Forecasting Using a Long-Short Term Memory Neural Network -- 1 Introduction -- 1.1 Artificial Neural Networks -- 2 Methodology -- 2.1 Data Provided by CENACE -- 2.2 LSTM Neural Network -- 2.3 Processing Data -- 2.4 Double-Input Long Short-Term Memory Neural Network -- 2.5 Triple-Input Long Short-Term Memory Neural Network -- 2.6 4-input Long Short-Term Memory Neural Network -- 2.7 Forecasting Errors -- 3 Results. 3.1 Double-Input LSTM -- 3.2 Triple-Input LSTM -- 3.3 Four-Input LSTM -- 4 Discussion and Conclusion -- References -- Computer Vision and Image Processing -- Benchmark Analysis for Backbone Optimization in a Facial Reconstruction Model -- 1 Introduction -- 2 Related Work -- 2.1 Face Reconstruction Models -- 2.2 Lightweight Backbone Architectures for Facial Reconstruction -- 3 Methodology -- 4 Results and Discussion -- 5 Conclusion -- References -- T(G)V-NeRF: A Strong Baseline in Regularized Neural Radiance Fields with Few Training Views -- 1 Introduction -- 2 Related Work -- 2.1 Neural Radiance Fields -- 2.2 Training a NeRF with (very) Few Images -- 3 Proposed Regularization Framework -- 3.1 Depth Map Regularization -- 3.2 Second-Order Regularization -- 3.3 Occlusion Regularization -- 4 Experimental Results -- 4.1 Implementation Details -- 4.2 Ablation Results -- 4.3 Quantitative Results -- 4.4 Qualitative Results -- 5

Conclusions -- References -- Nonlinear DIP-DiracVTV Model for Color Image Restoration -- 1 Introduction -- 2 DIP-Reg Models for Color Image Restoration -- 2.1 DIP-Reg Models -- 2.2 Euclidean Models: DIP-TV and DIP-VTV -- 2.3 Riemannian Model: DIP-RiemannVTV -- 3 Dirac Vectorial Total Variations of a Color Image -- 3.1 The Euclidean Dirac Operator and Its Main Properties -- 3.2 Dirac Operators for Color Images -- 4 Experiments -- 4.1 Numerical Scheme -- 4.2 Application to Denoising -- 4.3 Application to Deblurring -- 5 Conclusion --

References -- An Efficient Facial Verification System for Surveillance that Automatically Selects a Lightweight CNN Method and Utilizes Super-Resolution Images -- 1 Introduction -- 2 Related Work -- 3 Super-Resolution Methods -- 4 Light Facial Verification Methods -- 5 Proposed Dynamic Scaling with Super-Resolution Methods -- 6 Proposed Lightweight Facial Verification System -- 7 Experiments.

7.1 Implementation Details -- 7.2 Datasets -- 7.3 Selection of Super-Resolution Method -- 7.4 Evaluation with the Custom Dataset -- 7.5 Evaluation of the LFVS with the Datasets -- 8 Discussion -- 9

Conclusion -- References -- Nonlinear L2-DiracVTV Model for Color Image Restoration -- 1 Introduction -- 2 The L2-VTV Model for Color Image Restoration -- 2.1 Variational Models for Image Restoration -- 2.2 The L2-VTV Model and Its Solutions -- 2.3 Primal-Dual Algorithm -- 3 Non Linear L2-DiracVTV Model for Color Image Restoration -- 3.1 Dirac Operators for Color Images -- 3.2 Weighted Dirac Operators for Color Images -- 3.3 Linear Weighted Dirac Vectorial Total Variation and Its Dual Formulation -- 3.4 Variational Models for Color Image Restoration -- 4 Experiments -- 4.1 On the Choice of the Color Space -- 4.2 Denoising -- 4.3 Deblurring -- 5 Conclusion -- References --

An FPGA Smart Camera Implementation of Segmentation Models for Drone Wildfire Imagery -- 1 Introduction -- 2 State-of-the-Art -- 2.1 Segmentation Models for Wildfire Detection and Characterization -- 2.2 Smart Camera Implementations for Computer Vision -- 3 Proposed Method -- 3.1 General Overview of the Optimization Approach -- 3.2 Dataset: Corsican Fire Database -- 3.3 Segmentation Model Training -- 3.4 Optimization -- 3.5 Proposed FPGA-Based Smart Camera System -- 4 Results and Discussion -- 4.1 Comparison Metrics -- 4.2

Quantitative Results -- 4.3 Qualitative Results -- 5 Conclusions -- References --

Intelligent Systems -- An Argumentation-Based Approach for Generating Explanations in Activity Reasoning -- 1 Introduction -- 2 Background -- 3 Proposal -- 3.1 Human Activity Framework and Local Selection -- 3.2 Global Selection -- 4 Generating Explanations -- 5 Theoretical Evaluation -- 6 Conclusions and Future Work -- References.

A Decision Tree Induction Algorithm for Efficient Rule Evaluation Using Shannon's Expansion -- 1 Introduction -- 2 Background -- 3 Proposal -- 4 Experimental Results -- 5 Conclusions -- References --

Reasoning in DL-LiteR Based Knowledge Base Under Category Semantics -- 1 Introduction -- 2 Set-Theoretical Semantics of DL-LiteR -- 3 Category-Theoretical Semantics of DL-LiteR -- 4 Category-Theoretical Satisfiability for DL-LiteR -- 5 Conclusion -- References --

Applying Genetic Algorithms to Validate a Conjecture in Graph Theory: The Minimum Dominating Set Problem -- 1 Introduction -- 2

Background -- 3 The Conjecture to Be Verified -- 3.1 Generalized Quadrangle -- 3.2 The Minimum Dominating Set Problem -- 3.3 The Conjecture -- 4 Rank Genetic Algorithm for Finding Minimal Dominating Set -- 4.1 Solution Representation -- 4.2 Fitness Function -- 4.3 The Rank GA Operators -- 5 Results -- 6 Conclusions --

References -- Random Number Generator Based on Hopfield Neural Network with Xorshift and Genetic Algorithms -- 1 Introduction -- 2

NIST Testing Module -- 3 Related Works -- 3.1 Approaches Based on Chaotic Systems -- 3.2 Hybrid Pseudo Random Number Generator (PRNG) -- 3.3 Genetic Algorithms -- 4 PRNG Based on Hopfield Neural Network and Xorshift -- 5 PRNG Based on Genetic Algorithms -- 5.1 Selection -- 5.2 Loop -- 6 Tests and Results: PRNG Based on Hopfield Neural Network and Xorshift -- 6.1 Results of the NIST Module -- 6.2 Diehard Test Suite Results -- 7 Tests and Results: PRNG Based on Genetic Algorithms -- 7.1 Models to Compare with Ours -- 7.2 DieHarder Suite of Random Number Generator Tests -- 8 Discussion -- 9 Conclusion -- References -- Using Compiler Errors Messages to Feedback High School Students Through Machine Learning Methods -- 1 Introduction -- 2 Methodology -- 3 Classifier Development -- 3.1 Corpus Generation -- 3.2 Data Cleaning. 3.3 Vectorization.

---

Sommario/riassunto

The two-volume set LNAI 14391 and 14392 constitutes the proceedings of the 22nd Mexican International Conference on Artificial Intelligence, MICA I 2023, held in Yucatán, Mexico, in November 2023. The total of 49 papers presented in these two volumes was carefully reviewed and selected from 115 submissions. The proceedings of MICA I 2023 are published in two volumes. The first volume, Advances in Computational Intelligence, contains 24 papers structured into three sections: – Machine Learning – Computer Vision and Image Processing – Intelligent Systems The second volume, Advances in Soft Computing, contains 25 papers structured into three sections: – Natural Language Processing – Bioinformatics and Medical Applications – Robotics and Applications.
