

1. Record Nr.	UNISA996574686103316
Titolo	802.5-1998 - IEEE Information Technology - Telecommunications and information exchange between systems - Local and metropolitan area networks . Part 5, Token ring access method and physical layer specifications // IEEE Computer Society LAN/MAN Standards Committee [and four others]
Pubbl/distr/stampa	New York, N.Y. : , : IEEE, , 1998
ISBN	1-55937-960-X
Descrizione fisica	1 online resource (x, 243 pages) : illustrations
Disciplina	004.62
Soggetti	Computer network protocols - Standards Computer network protocols - Standards - United States Local area networks (Computer networks) - Standards Local area networks (Computer networks) - Standards - United States Metropolitan area networks (Computer networks) - Standards Metropolitan area networks (Computer networks) - Standards - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This Local and Metropolitan Area Network standard, ISO/IEC 8802-5: 1998, is part of a family of local area network (LAN) standards dealing with the physical and data link layers as defined by the ISO/IEC Open Systems Interconnection Basic Reference Model. Its purpose is to provide compatible interconnection of data processing equipment by means of a LAN using the token-passing ring access method.
