

1. Record Nr.	UNISA996574694903316
Titolo	251-1984 - IEEE Guide : Test Procedures for Direct-Current Tachometer Generators / / IEEE Rotating Machinery Committee, American National Standards Institute
Pubbl/distr/stampa	New York, N.Y. : , : IEEE, , 1984
ISBN	1-5044-0665-6
Descrizione fisica	1 online resource (15 pages)
Disciplina	621.313
Soggetti	Electric generators - Direct current Tachometer Electric generators - Testing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This test procedure covers instructions for conducting and reporting the more generally applicable and acceptable tests to determine the performance characteristics of direct-current tachometer generators. Direct-current tachometer generators are used for a variety of indicating and control purposes and a characteristic of primary importance in one application may be of little or no importance in another. This procedure shall not be interpreted or construed as requiring the making of all or any of the tests herein in any given transaction.
