| ISBN | 1-5044-8293-X |
| Descrizione fisica | 1 online resource (35 pages) |
| Disciplina | 004.22 |
| Soggetti | Computer architecture Household electronics |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Sommario/riassunto | Wearable Consumer Electronic Devices (Wearables) are given an overview, terminology, and categorization in this standard. An architecture for a series of standard specifications that define technical requirements and testing methods for different aspects of wearables-- from basic security and suitability of wear to various functional areas, such as health, fitness, and infotainment--is further outlined. |
