Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	The FPT conference is the premier conference in the Asia Pacific region on field programmable technologies including reconfigurable computing devices and systems containing such components Field programmable devices promise the flexibility of software with the performance of hardware The development and application of field programmable technology have become important topics of research and development Field programmable technology is widely applied, in high performance computing systems, embedded and low power control instruments, mobile communications, rapid prototyping and product emulation, among other areas The scope of the conference includes Tools and Design Techniques, Architectures, Device techniques and Applications for field programmable technology, etc.
