

1. Record Nr.	UNISA996575249303316
Titolo	European Wireless 2021 : 26th European Wireless Conference 10-12 November 2021, Verona, Italy
Pubbl/distr/stampa	Berlin, : VDE Verlag, 2021
ISBN	1-5231-5474-8 3-8007-5673-0
Edizione	[Neuerscheinung]
Descrizione fisica	Online-Ressource (160 S.)
Soggetti	Wireless Communication Mobile Communication 5G Network programmability Satellite-5G Integration
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	PublicationDate: 20211217
Sommario/riassunto	<p>Long description: EW 2021 is organized by the Consorzio Nazionale Interuniversitario per le Telecomunicazioni (CNIT). The conference is aimed to address new research results in the field of 5G technologies, with a special focus on emerging methodologies expected to have an unprecedented impact on the service flexibility and network efficiency of future wireless systems. The theme of this edition, which is the 25th of a long history of the European Wireless conferences, specifically is Virtualization paradigms and satellite integration in future generation wireless communications. EW 2021 is aimed at addressing a key theme on Virtualization paradigms and satellite integration in future generation wireless communications. Topics of interest include, but are not limited to, the following: o Radio Access Networks and Backhaul/Fronthaul o Edge and Core Network o 5G and Beyond Verticals and Services o Satellite-5G Integration o Wireless Security Moreover, keynote and tutorials on emerging technologies will be included in the programme of this exciting event. Participation to tutorials will be included in the conference registration.</p>
