

1. Record Nr.	UNISA996575255003316
Titolo	C57.164-2021 - IEEE Guide for Establishing Short-Circuit Withstand Capabilities of Liquid-Filled Power Transformers, Regulators, and Reactors // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 2022
ISBN	1-5044-8309-X
Descrizione fisica	1 online resource (44 pages)
Disciplina	621.31921
Soggetti	Short circuits Electric circuits
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Guidance on determining and establishing short-circuit withstand capabilities of power transformers, regulators, and reactors is provided in this standard.
