

1. Record Nr.	UNISA996575264003316
Titolo	C57.12.30-2020 - IEEE standard for pole-mounted equipment-- enclosure integrity for coastal environments // IEEE
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 2021
ISBN	1-5044-7265-9
Descrizione fisica	1 online resource
Disciplina	667.9
Soggetti	Coatings Electric transformers
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Conformance tests and requirements for the coating integrity of pole-mounted enclosures containing apparatus energized in excess of 600 V, and for application in coastal environments, are specified in this standard. These enclosures are typically located out of reach of the general public, and include, but are not limited to, the following types of equipment enclosures: pole-mounted distribution transformers, pole-mounted switches, pole-mounted regulators, pole-mounted metering equipment, pole-mounted reclosers, and pole-mounted switchgear.
