

1. Record Nr.	UNISA996575559103316
Titolo	11073-10417-2009 - Health informatics . Part 10417, Device specialization : Glucose meter ; ; Personal health device communication // IEEE 11073 Standards Committee of the IEEE Engineering in Medicine and Biology Society
Pubbl/distr/stampa	Piscataway, NJ : , : IEEE, , 2009
ISBN	0-7381-5893-3
Descrizione fisica	1 online resource (vii, 53 pages) : illustrations
Collana	IEEE Std ; ; 11073-10417-2009
Disciplina	616.07
Soggetti	Glucose Medical electronics - Standards Medical instruments and apparatus - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Within the context of the ISO/IEEE 11073 family of standards for device communication, this standard establishes a normative definition of communication between personal telehealth glucose meter devices and compute engines (e.g., cell phones, personal computers, personal health appliances, and set top boxes) in a manner that enables plug-and-play interoperability. It leverages appropriate portions of existing standards including ISO/IEEE 11073 terminology, information models, application profile standards, and transport standards. It specifies the use of specific term codes, formats, and behaviors in telehealth environments restricting optionality in base frameworks in favor of interoperability. This standard defines a common core of communication functionality for personal telehealth glucose meters.
