Introduction -- Understanding Men on Television -- Trying to Man Up: Struggling with Contemporary Masculinities in Cable's Male-Centered Serials -- Any Men and Outlaws: The Unbearable Burden of Straight White Man -- Where Men Can Be Men: The Homosocial Enclave and Jocular Policing of Masculinity -- Dynamic Duos: Hetero Intimacy and the New Male Friendship -- Conclusion: Is It the End of Men as We Know Them?

Sommario/riassunto

The emergence of "male-centered serials" such as *The Shield*, *Rescue Me*, and *Sons Of Anarchy* and the challenges these characters face in negotiating modern masculinities. From the meth-dealing but devoted family man Walter White of AMC's *Breaking Bad*, to the part-time basketball coach, part-time gigolo Ray Drecker of HBO's *Hung*, depictions of male characters perplexed by societal expectations of men and anxious about changing American masculinity have become standard across the television landscape. Engaging with a wide variety of shows, including *The League*, *Dexter*, and *Nip/Tuck*, among many others, Amanda D. Lotz identifies the gradual incorporation of second-wave feminism into prevailing gender norms as the catalyst for the contested masculinities on display in contemporary cable dramas. Examining the emergence of "male-centered serials" such as *The Shield*, *Rescue Me*, and *Sons of Anarchy* and the challenges these characters face in negotiating modern masculinities, Lotz analyzes how these shows combine feminist approaches to fatherhood and marriage with more traditional constructions of masculine identity that emphasize men's role as providers. She explores the dynamics of close male friendships both in groups, as in *Entourage* and *Men of a Certain Age*, wherein characters test the boundaries between the homosocial and homosexual in their relationships with each other, and in the dyadic intimacy depicted in *Boston Legal* and *Scrubs*. *Cable Guys* provides a much-needed look into the under-considered subject of how constructions of masculinity continue to evolve on television.

2. Record Nr.	UNINA9910254654803321
Titolo	Coloproctology // edited by Alexander Herold, Paul-Antoine Lehur, Klaus E. Matzel, P. Ronan O'Connell
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2017
ISBN	3-662-53210-7
Edizione	[2nd ed. 2017.]
Descrizione fisica	1 online resource (XVI, 465 p. 172 illus., 126 illus. in color.)
Collana	European Manual of Medicine, , 2626-7845
Disciplina	617.555
Soggetti	Rectum—Surgery Proctology Colorectal Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	History Of The Division Of Coloproctology -- Anatomy of the Colon, Rectum, Anus and Pelvic Floor -- Physiology -- Haemorrhoids -- Anal fissure -- Anorectal Abscess and Fistula -- Perianal skin conditions -- Pilonidal Disease -- Faecal Incontinence -- Constipation -- Defaecation Disorders -- Rectal Prolapse, Intussusception, Solitary Rectal Ulcer -- Irritable Bowel Syndrome -- Ulcerative colitis -- Crohn's disease -- Indeterminate colitis -- Diverticular Disease -- Other Colitides -- Medical Treatment of Inflammatory Bowel Disease -- Endometriosis -- Appendicitis -- Benign Tumours -- Tumour Classification -- Genetics -- Colon Cancer -- Rectal cancer -- Anal Intraepithelial Neoplasia and Anal Cancer -- Peritoneal Malignancies and Colorectal Peritoneal Metastases -- Retrorectal Tumors -- Stomas and Stomatherapy -- Endoscopy – Diagnostics, therapeutic, surveillance, new techniques -- Anal and Rectal Trauma -- Colonic and Rectal Obstruction -- Lower Gastrointestinal Bleeding -- Chronic pelvic and perineal pain -- Perioperative management -- Intestinal Failure -- Abdominal Wall Reconstruction.
Sommario/riassunto	This book offers up-to-date coverage of the full range of topics in coloproctology: anatomy, physiology, anal disorders, dermatology, functional disorders, inflammatory bowel disease, endometriosis,

appendicitis, benign and malignant tumors, presacral tumors, laparoscopy, endoscopy, perioperative management, intestinal failure, abdominal wall reconstruction, emergencies, and pain syndromes. Each of the chapters on individual disorders provides a comprehensive overview on etiology, incidence, epidemiology, diagnostics, medical and surgical treatment, access, complications, and special considerations. In presenting data, care is always taken to refer to the best available level of evidence. The book forms the latest addition to Springer's European Manual Medicine series and is the second edition of Coloproctology. It will be the first standard recommended textbook of the European Society of Coloproctology. The editors have again assembled a group of experienced authors, each of whom has an international reputation within coloproctology or an allied specialty and a desire to see ever-improving standards in coloproctology throughout Europe. By including contributions from authors across Europe, the book provides a great breadth of knowledge and reflects diversity of clinical practice. The manual provides surgical trainees with a comprehensive and condensed guide to the knowledge required for the European Board of Surgery Qualification (EBSQ) examination. It will also be a valuable aid to the many practicing coloproctologists across Europe and beyond who undertake continuing professional development and a useful source of information for researchers and clinicians in allied disciplines.
