Nota di contenuto	Intro -- Contents -- Introduction: Meeting the inclusion challenge in innovation -- Back to the future: Reflection on healthcare's past to understand its future -- Sustainable user involvement: Building a user community and fostering high-quality research -- The emergence of a boundary innovation space - the case of Norwegian Smart Care Lab -- The creation of a community to engage in innovation processes and citizen science -- Ageing in your place: Envisioning healthy, happy, and safe ageing in a neighbourhood with citizen science methods -- Climbing the citizen science ladder: Juxtaposing citizens' levels of participation and influence in research analysis and dissemination -- Creating new paths: Collaborative challenges in establishing an innovation hub -- Digital futures - enabling innovation through a boundary space -- Patient innovation as a case-study example of a multisided platform for involving patients in the social innovation process -- Crisis entrepreneurship: To be a robust link in the chain -- Superpower or kryptonite? -- The impact of users on the development of Morpheus auto personalization -- The dilemma of achieving responsible innovation in regulated markets -- Navigating towards improved user engagement in healthcare innovation - releasing the power of users -- List of contributors -- List of figures -- List of tables -- Index.
Sommario/riassunto	User inclusion in innovation is increasingly the target of policy rhetoric

at both organizational and societal levels. And extensive research has demonstrated the potential contribution that users can make, both at the 'front end' of innovation with their ideas and insights and downstream, facilitating adoption and diffusion.
