Soggetti	PHILOSOPHY / Epistemology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Frontmatter -- Contents -- Acknowledgments -- 0. Introduction -- 1. Psychiatric Diagnostics -- 2. Modelling, Qualitative Models, and Model-Based Diagnostics -- 3. Diagnostic Reasoning as Modelling -- 5. Fulfilling Desiderata -- 6. Evaluating Alternative Views -- 7. Conclusion -- Sources
Sommario/riassunto	How do clinical psychiatrists arrive at their diagnostic conclusions? Little attention has been directed to this question by philosophers of psychiatry. Adrian Kind presents a systematic, in-depth philosophical investigation into this question and argues that psychiatric diagnostic reasoning can be understood as a model-based reasoning procedure analogous to scientific model-based reasoning. To support this, he draws on ideas from the philosophy of science, psychiatry, cognitive science, and artificial intelligence. This study is an invaluable resource for practicing psychiatrists, philosophers interested in psychiatry, and researchers in artificial intelligence or cognitive science interested in medical cognition.
