Sommario/riassunto	Precarious living conditions across the Balkans, the Middle East, and North Africa create fertile ground for radical ideas. Yet, despite genuine grievances and legitimate grounds for anger, most people living in these regions are not radicalized and do not embrace ideas that lead to acts of violent extremism. Which raises the question . why? To answer this question, the authors of Resisting Radicalization investigate the nonoccurrence of violent extremism in what they term enabling

environments. Their work, the result of a multiyear international project, has critical implications for the future of P/CVE (Preventing and Countering Violent Extremism) programs.
