   Titolo   Software-Infrastruktur. Von analytischer Perspektive zu konstruktiver Orientierung

   Pubbl/distr/stampa   Hamburg, : Hamburg University Press, 2003

   Descrizione fisica   1 online resource (320)

   Soggetti   Computer programming / software development

   Lingua di pubblicazione   Tedesco

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Sommario/riassunto   The term "infrastructure" is used here for information systems. Software applications are related to other software and consist of software of different origins. In their networking, software is under the limited influence of different actors. Nowadays, software development is mainly concerned with further development, parameterization and configuration. Software infrastructure development must therefore deal with existing software and be carried out in complex contexts, taking into account a sharply increased number of interests and opportunities for interaction. Interference is recognized as a particular problem in infrastructure development. The proposed interference management addresses this. The core point of the extended evolutionary software development process is the continuous development of the relevant components and actors of the infrastructure against the background of our own development project, taking into account the various interests.

Autore	Mori Hirohiko
Titolo	Human Interface and the Management of Information : Thematic Area, HIMI 2025, Held as Part of the 27th HCI International Conference, HCII 2025, Gothenburg, Sweden, June 22–27, 2025, Proceedings, Part III / / edited by Hirohiko Mori, Yumi Asahi
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	3-031-93828-3
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (340 pages)
Collana	Lecture Notes in Computer Science, , 1611-3349 ; ; 15775
Altri autori (Persone)	AsahiYumi
Disciplina	005.437 004.019
Soggetti	User interfaces (Computer systems) Human-computer interaction Social sciences - Data processing Computer networks Electronic commerce Artificial intelligence User Interfaces and Human Computer Interaction Computer Application in Social and Behavioral Sciences Computer Communication Networks e-Commerce and e-Business Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The three-volume set LNCS 15773 - 15775 constitutes the thoroughly refereed proceedings of the thematic area Human Interface and the Management of Information, HIMI 2025, held as part of the 27th International Conference on Human-Computer Interaction, HCI International 2025 (HCII 2025), which was held in Gothenburg, Sweden, during June 22–27, 2025. The total of 1430 papers and 355 posters included in the HCII 2025 proceedings was carefully reviewed and selected from 7972 submissions. The papers in these proceedings have

been organized in topical sections as follows: Part I: Information design and visualization; human-human and human-AI collaboration; user experience design and evaluation; Part II: Information in eHealth; information, knowledge and learning; Part III: Multimodality and information; eCommerce and industrial applications.
