Sommario/riassunto	This book constitutes the refereed proceedings of the 4th International Conference on Algebra and Coalgebra in Computer Science, CALCO 2011, held in Winchester, UK, in August/September 2011. The 21 full papers presented together with 4 invited talks were carefully reviewed and selected from 41 submissions. The papers report results of theoretical work on the mathematics of algebras and coalgebras, the way these results can support methods and techniques for software development, as well as experience with the transfer of the resulting technologies into industrial practice. They cover topics in the fields of abstract models and logics, specialized models and calculi, algebraic and coalgebraic semantics, and system specification and verification. The book also includes 6 papers from the CALCO-tools Workshop, colocated with CALCO 2011 and dedicated to tools based on algebraic and/or coalgebraic principles.

Sommario/riassunto	This paper analyzes the macroeconomics of HIV/AIDS. The paper highlights that the mortality and morbidity associated with AIDS make it unlike most other types of sickness and disease. The paper describes the most common approaches used in accounting for growth in the context of an HIV/AIDS epidemic. The impact of HIV/AIDS on education and the accumulation of human capital is discussed. The paper also discusses the impact of HIV/AIDS on the public sector, and elaborates certain demographic events specific to the HIV/AIDS pandemic.
