	Sommario/riassunto	Panare, also known as E'ñapa Woromaipu, is a seriously endangered Cariban language spoken by about 3,500 people in Central Venezuela. A Typological Grammar of Panare by Thomas E. Payne and Doris L. Payne, is a full length linguistic grammar written from a modern functional and typological perspective. The many remarkable characteristics highlighted in the grammar include a 'split-inverse'

person marking system, transitivity-sensitive aspect and person-marking verb morphology, object incorporation, relatively nonconfigurational NP structure, both verb-initial and object-initial constituent orders, a complex system of clause chaining, switch reference, and a rich system of evidential and epistemic marking.
