Sommario/riassunto	This thoroughly updated and expanded second edition is an authoritative resource on industrial measurement systems and sensors, with particular attention given to temperature, stress, pressure, acceleration, and liquid flow sensors. This edition includes new and expanded chapters on wireless measuring systems and measurement control and diagnostics systems in cars. Moreover, the book introduces new, cost-effective measurement technology utilizing www servers and LAN computer networks - a topic not covered in any other resource. Coverage of updated wireless measurement systems and wireless GSM/LTE interfacing make this book unique, providing in-depth, practical knowledge. Professionals learn how to connect an instrument to a computer or tablet while reducing the time for collecting and processing measurement data. This hands-on reference presents digital temperature sensors, demonstrating how to design a monitoring system with multipoint measurements. From computer-based measuring systems, electrical thermometers and pressure sensors, to conditioners, crate measuring systems, and virtual instruments, this comprehensive title offers engineers the details they need for their work in the field.

Sommario/riassunto

Cheap print moved across Europe in surprising ways, crossing unusual distances by unusual routes and by unusual means. Pedlars, news, and cheap print defy the conventional categories and models of distribution: we need to think about their extraordinary diversity, and about the means by which their unstable cultural images inflect distribution. Books were not dead things, and the examination of Italy, the Netherlands and Britain, three regions that contain instructive parallels and contrasts, reveals their unpredictable liveliness. This collection of essays, which emerges from transnational dialogues about pedlars and commerce and communication, examines the various means by which cheap print moved across Europe, and the cultural and material and economic premises of the European landscape of printing. Contributors include: Alberto Milano; Jason Peacey; Jeroen Salman; Jo Thijssen; Joad Raymond; Joop Koopmans; Karen Bowen; Kate Peters; Melissa Calaresu; Roeland Harms; Rosa Salzberg; Sean Shesgreen.
