Sommario/riassunto	Environments, landscapes, and ecological systems are often seen as fundamental by archaeologists, but how they relate to society is understood in very different ways. The chapters in this book take environment, culture, and technology together. All have been the focus of much attention; often one or other has been seen as the starting point for analysis, but this volume argues that it is the study of the inter-relationships between these three factors that offers a way forward. The contributions to this book pick up different strands within the tangled web of intersections between environme
