Sommario/riassunto

The European Union and the Arctic brings together academics from a range of disciplines to discuss the EU's potential roles in shaping Arctic governance. The book is divided into three parts. The first part examines the EU's current Arctic policy framework. The second part focuses on the EU's engagement with Arctic governance at the regional level and encompasses the EU's engagement with the so-called Arctic Five (five coastal States of the Arctic Ocean), providing examples of some of those relationships. The third part takes a sectoral approach, analysing the EU's potential contribution to regulation of key human activities in the Arctic, including shipping, fisheries, oil and gas operations, and marine mammals.
