Sommario/riassunto

Migration wird von der Salzburger Forschungsinitiative Musik und Migration als Sammelbegriff für verschiedene Wanderungshandlungen (u.a. Arbeits-, Bildungs- und Fluchtmigration) verstanden. Diese sind – in unterschiedlicher Ausprägung – für alle Zeiträume menschlicher Existenz dokumentierbar. Migrationsforschung erweist sich als interdisziplinär relevantes Wissenschaftsfeld, zu deren Erschließung die Musikwissenschaften substanziell beitragen können. Die hierfür maßgeblichen methodischen Entscheidungen bieten Herausforderungen, die es anzunehmen gilt. Der vorliegende Band enthält Diskussionsbeiträge in Form theoretischer und methodischer Überlegungen sowie Hinweise auf Fallbeispiele musikwissenschaftlicher Migrationsforschung.

Sommario/riassunto

"This book on end of life examines how to include people with intellectual and developmental disability in the inevitability of dying and death. Comprising 17 chapters, it addresses challenging and under-researched topics including suicide, do-not-resuscitate, advance care planning, death doulas and accessible funerals. Topics reflect everyday community, palliative care, hospice and disability services. The book proposes that the rights of people with disabilities should be supported up to and after their death. Going beyond problem identification, the chapters offer positive, evidence-supported responses that translate research to practice, together with practice examples and resources grounded in lived experience. The book is applicable to readers from the disability field, and mainstream health professionals who assist people with disability in emergency care, palliative care or end-of-life planning."--
