1. Record Nr. UNINA9910456096603321

Titolo	The use of drugs in food animals [[electronic resource]] : benefits and risks / / Committee on Drug Use in Food Animals, Panel on Animal Health, Food Safety, and Public Health, Board on Agriculture, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1999
ISBN	0-309-52536-5 0-585-03810-4
Descrizione fisica	1 online resource (276 p.)
Disciplina	363.19/2
Soggetti	Veterinary drugs Antibiotics in veterinary medicine Food animals - Diseases - Chemotherapy Veterinary drug residues Food of animal origin - Contamination Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 210-234) and index.
Nota di contenuto	""Front Matter""; ""Preface""; ""Acknowledgments""; ""Contents""; ""Tables and Figures""; ""Executive Summary""; ""1 Drugs Used in Food Animals: Background and Perspectives""; ""2 Food-Animal Production Practices and Drug Use""; ""3 Benefits and Risks to Human Health""; ""4 Drug Development, Government Approval, and the Regulatory Process""; ""5 Drug Residues and Microbial Contamination in Food: Monitoring and Enforcement""; ""6 Issues Specific to Antibiotics""; ""7 Costs of Eliminating Subtherapeutic Use of Antibiotics"" ""8 Approaches to Minimizing Antibiotic Use in Food-Animal Production""""""References""; ""About the Authors""; ""Index""

2.

Record Nr.	UNISALENTO991000689679707536
Autore	Malebranche, Nicolas : de
Titolo	Oeuvres completes de Malebranche. 11, Traité de morale / Nicolas de Malebranche ; edité par Michel Adam
Pubbl/distr/stampa	Paris : Vrin, 1966
Descrizione fisica	XVIII, 307 p. ; 23 cm.
Collana	Bibliothèque des textes philosophiques
Altri autori (Persone)	Adam, Michel
Disciplina	170
Soggetti	Morale
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia

3.

Record Nr.	UNINA9910557346803321
Autore	Garcia-Gonzalez Carlos A
Titolo	Biopolymers in Drug Delivery and Regenerative Medicine
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2021
Descrizione fisica	1 online resource (194 p.)
Soggetti	Medicine and Nursing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Biopolymers including natural (e.g., polysaccharides, proteins, gums, natural rubbers, bacterial polymers), synthetic (e.g., aliphatic polyesters

and polyphosphoester), and biocomposites are of paramount interest in regenerative medicine, due to their availability, processability, and low toxicity. Moreover, the structuration of biopolymer-based materials at the nano- and microscale along with their chemical properties are crucial in the engineering of advanced carriers for drug products. Finally, combination products including or based on biopolymers for controlled drug release offer a powerful solution to improve the tissue integration and biological response of these materials. Understanding the drug delivery mechanisms, efficiency, and toxicity of such systems may be useful for regenerative medicine and pharmaceutical technology. The main aim of the Special Issue on "Biopolymers in Drug Delivery and Regenerative Medicine" is to gather recent findings and current advances on biopolymer research for biomedical applications, particularly in regenerative medicine, wound healing, and drug delivery. Contributions to this issue can be as original research or review articles and may cover all aspects of biopolymer research, ranging from the chemical synthesis and characterization of modified biopolymers, their processing in different morphologies and hierarchical structures, as well as their assessment for biomedical uses.
