

1. Record Nr.	UNISALENTO991000820499707536
Autore	Hansen, Vagn Lundsgaard
Titolo	Differential geometry : proc. of the Nordic Summer School held in Lyngby, Denmark July 29-August 9, 1985 / ed. by V. L. Hansen
Pubbl/distr/stampa	Berlin ; Heidelberg : Springer-Verlag, 1987
ISBN	3540180125
Descrizione fisica	150 p. ; 24 cm.
Collana	Lecture notes in mathematics, 0075-8434 ; 1263
Classificazione	AMS 32C10 AMS 32H10 AMS 53-06 AMS 53-XX AMS 53C05 AMS 53C20 AMS 53C55 AMS 53C80 AMS 58E05 AMS 58E20 AMS 58G30
Disciplina	516.36
Soggetti	Complex manifolds Differential geometry - Congresses Holomorphic mappings Kernel functions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910576872803321
Titolo	Urological Cancer 2021
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (328 p.)
Soggetti	Chemistry Research & information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Cancer of the urological sphere is a disease continuously increasing in numbers in the statistics of tumor malignancies in Western countries. Although this fact is mainly due to the contemporary increase of life expectancy of the people in these geographic areas, many other factors do contribute as well to this growth. Urological cancer is a complex and varied disease of different organs and mainly affects the male population. In fact, kidney, prostate, and bladder cancer are regularly included in the top-ten list of the most frequent neoplasms in males in most statistics. The female population, however, has also increasingly found itself affected by renal and bladder cancer in the last decade. Considering these altogether, urological cancer is a problem of major concern in developed societies. This Topic Issue of Cancers intends to shed some light into the complexity of this field and will consider all useful and appropriate contributions that scientists and clinicians may provide to improve urological cancer knowledge for patients' benefit. The precise identification of the molecular routes involved, the diagnostic pathological criteria in the grey zones, the dilemma of T1G3 management, and the possible treatment options between superficial, nonmuscle-invasive and muscle-invasive diseases will be particularly welcomed in this Issue.</p>
