Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section I. Principles of practice -- section II. Basic principles -- section III. Preventive and primary care -- section IV. General gynecology -- section V. Operative gynecology -- section VI. Urogynecology and pelvic reconstructive surgery -- section VII. Reproductive endocrinology -- section VIII. Gynecologic oncology.
Sommario/riassunto	"Berek and Novak's Gynecology is the gold standard text in general gynecology serving both as a comprehensive reference and a practical, clinically-oriented text. This reference is not only a must-have product for residents in training, but it offers information for the practicing physician. The book covers the entire spectrum of women's healthcare by offering guidance for the management of specific gynecologic conditions in eight sections. The first two sections cover principles of practice and initial assessment and the relevant basic science. The third section is on preventive and primary care for women, and the remaining five sections are directed at methods of diagnosis and management in general gynecology, operative general gynecology, urogynecology and pelvic reconstructive surgery, reproductive endocrinology, and gynecologic oncology"--Provided by publisher.

3. Record Nr.	UNINA9910827837603321
Autore	Hyatt Robert E
Titolo	Interpretation of pulmonary function tests : a practical guide // Robert E. Hyatt, Paul D. Scanlon, Masao Nakamura
Pubbl/distr/stampa	Philadelphia : , : Lippincott Williams and Wilkins, , [2009] ©2009
ISBN	1-4511-5738-X
Edizione	[Third edition.]
Descrizione fisica	1 online resource (272 p.)
Altri autori (Persone)	ScanlonPaul D (Paul David) NakamuraMasao (Pulmonologist)
Disciplina	616.2/40754
Soggetti	Pulmonary function tests
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Spirometry: dynamic lung volumes -- Static (absolute) lung volumes -- Diffusing capacity of the lungs -- Bronchodilators and bronchial challenge testing -- Arterial blood gases -- Other tests of lung mechanics: resistance and compliance -- Distribution of ventilation -- Maximal respiratory pressures -- Preoperative pulmonary function testing -- Simple tests of exercise capacity -- Patterns in various diseases -- When to test and what to order -- Approaches to interpreting pulmonary function tests -- Illustrative cases.
