Note generali	"The majority of the papers collected in this volume are based on talks given at the conference ... held at Hamburg University by the Hamburg Research Group "Narratology" (Forschergruppe Narratologie) from October 13 to 15, 2006, titled "Point of View, Perspective, Focalization: Modeling Mediacy."
Nota di contenuto	Frontmatter -- Contents -- Introduction -- Part I: Re-Specifications of Perspective -- The DNS of Mediacy -- Focalization: Where Do We Go from Here? -- Perspectivization and Focalization: Two Concepts-One Meaning? An Attempt at Conceptual Differentiation -- A Brief Introduction to an Enunciative Approach to Point of View -- Narrative and Stylistic Agency: The Case of Overt Narration -- Beyond Voice and Vision: Cognitive Grammar and Focalization Theory -- Plural Focalization, Singular Voices: Wandering Perspectives in "We"-Narration -- Part II: Some Special Aspects of Mediation -- A Comparative Analysis of Indices of Narrative Point of View in Bulgarian and English -- Focalization, the Subject and the Act of Shaping Perspective -- Coming to Our Senses: Narratology and the Visual -- Part III: Transliterary Aspects of Mediation -- Organizing the Perspectives: Focalization and the Superordinate Narrative System in Drama and Theater -- Focalization, Ocularization and Auricularization in Film and Literature -- Film Narratology: Who Tells? Who Shows? Who Focalizes? Narrative Mediation in Self-Reflexive Fiction Films -- Perspective in Contemporary Computer Games -- Backmatter
Sommario/riassunto	Stories do not actually exist in the (fictional or factual) world but are constituted, structured and endowed with meaning through the process of mediation, i.e. they are represented and transmitted through systems of verbal, visual or audio-visual signs. The terms usually proposed to describe aspects of mediation, especially perspective, point of view, and focalization, have yet to bring clarity to this field, which is of central importance, not only for narratology but also for literary and media studies. One crucial problem about mediation concerns the dimensions of its modeling effect, particularly the precise status and constellation of the mediating agents, i.e. author, narrator or presenter and characters. The question is how are the structure and the meaning of the story conditioned by these different positions in relation to the mediated happenings perceived from outside and/or inside the storyworld? In this volume, fourteen articles by international scholars from seven different countries address these problems anew from various angles, reviewing the sub-categorization of mediation and re-specifying its dimensions both in literary texts and other media such as drama and theater, film, and computer games.

Nota di contenuto	The Paradox of Rationality and Selfishness -- Two Asymmetric and Uncertain Selection---Start Thinking by a Hammer -- Inheritance of Acquired Character and Outbreak of Mass Incidents ---Increasing Pressure Accelerates the Evolution of Altruistic Behavior -- Social Cooperation: Drive Toward Choice of Sex -- Cooperation & Slavery---Free Competition to Social Division of Labor -- The Significance of Our Survival.
Sommario/riassunto	This book reviews the antinomy of rationality and selfishness raised from egoism, though rationality and selfishness are understood as basic evolutionary dynamics of humans and other organisms in both classical economics and evolutionary biology. Based on the research and a comparison with human's social cooperative behavior, the author presents his belief that the social cooperative system, in its essence, cooperation and conflict are of uncertain stochasticity resulting from their intrinsic asymmetric interaction between cooperative partners. The book then discusses limitations of Newton's methodology of

monism in both biology and social science. The understanding of the asymmetric and uncertain characteristics found in cooperation system needs perspective of quantum physics of pluralism. At the end of the book, the author undertakes a review of consistency of Newtonian and monism philosophy and the links between quantum physics and pluralism philosophy.
