Monografia

Les actes du XXXe colloque de l'Association Française pour l'Étude de l'Âge du Fer (A.F.E.A.F.) - Saint-Romain-en-Gal, 2006 - rassemblent en un seul volume les 16 communications du thème régional et les 28 du thème spécialisé, co-organisé avec l'Association pour la Promotion des Recherches sur l'âge du Bronze (A.P.R.A.B.). La question du territoire est la trame de fond de la partie régionale, suscitée par le dynamisme et les résultats de l'archéologie à Lyon et dans la région (du Mâconnais à la Loire et aux Alpes). Cette question est abordée par l'examen des sources écrites, d'utiles synthèses et la présentation de sites remarquables, en contexte d'habitat ou funéraire. L'enjeu du thème spécialisé était s'éclaircir la difficile question du passage de l'âge du Bronze à l'âge du Fer. Comment cerner les signes du changement, l'expliquer, en saisir le moment ? La plupart des auteurs ont choisi une fourchette chronologique large et se sont placés dans l'optique d'une évolution d'ordre endogène. Le critère du métal n'apparaît pas comme le plus pertinent. La fragmentation des faciès céramiques, la rupture de l'unité culturelle prévalant entre le XI^e et le VII^e siècles, des comportements nouveaux constatés dans les habitats et les pratiques funéraires : la situation est contrastée dans une Europe étudiée ici avec des exemples allant de l'Espagne à l'Italie, de la Grande-Bretagne à la Bohême. So dynamic was archaeology in Lyon and its surrounding region (Macon, the Loire Country and the Alps), that focus was kept on regional topics and that the question of «territory» was kept as the main line of research. The question has been tackled from many angles: written sources, enlightening summaries and synthetized works, presentation of quite remarkable sites, whether settlement sites or burial sites. The whole point was to shed light on the transitional phase between the Bronze Age and the Iron Age. What are the signs of a change, how to explain them, how to pinpoint them?...

3. Record Nr.	UNINA9910792843503321
Autore	Etzioni Amitai
Titolo	Avoiding War with China : Two Nations, One World / / Amitai Etzioni
Pubbl/distr/stampa	Baltimore, Maryland : , : Project Muse, , 2017 Baltimore, Md. : , : Project MUSE, , 2017 ©2017

Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- 1. Who authorized preparations for war with China? -- 2. China : making an adversary? -- 3. How aggressive is China? -- 4. Is China a responsible stakeholder? -- 5. Accommodating China -- 6. Is the United States trying to integrate China into the international order? -- 7. To contain or not? When and where is the question -- 8. Armed humanitarian interventions versus regime changes -- 9. Freedom of navigation assertions : the United States as the world's policeman -- Conclusion.
Sommario/riassunto	Are the United States and China on a collision course? In response to remarks made by Donald Trump's secretary of state, China's state-run newspaper Global Times asserted, "Unless Washington plans to wage a large-scale war in the South China Sea, any other approaches to prevent Chinese access to the [disputed] islands will be foolish." Some experts contend that conflict is inevitable when an established power does not make sufficient room for a rising power. In this timely new work, renowned professor of international relations Amitai Etzioni explains why this would be disastrous and points to the ways the two nations can avoid war. The United States is already preparing for a war with China, Etzioni reveals. However, major differences of opinion exist among experts on the extent of military commitment required, and no

plan has been formally reviewed by either Congress or the White House, nor has any been subjected to a public debate. Etzioni seeks here to provide a context for this long overdue discussion and to explore the most urgent questions: How aggressive is China? How powerful is it? Does it seek merely regional influence, or regional dominance, or to replace the United States as the global superpower? The most effective means of avoiding war, several experts argue, requires integrating China into the prevailing rule-based, liberal, international order. Etzioni spells out how this might be achieved and considers what can be done to improve the odds such an integration will take place. Others call for containing or balancing China, and Etzioni examines the risk posed by our alliances with various countries in the region, particularly India and Pakistan. With insight and clarity Etzioni presents our best strategy to reduce tension between the two powers, mapping out how the United States can accommodate China's regional rise without undermining its core interests, its allies, and the international order.
