Sommario/riassunto	"With the supposed shortening of our attention spans, what future is there for fiction in the age of the internet? Contemporary Fictions of Attention rejects this discourse of distraction-crisis which suggests that the future of reading is in peril, and instead finds that contemporary writers construct 'fictions of attention' that find some value in states or moments of inattention. Through discussion of work by a diverse selection of writers, including Joshua Cohen, Ben Lerner, Tom McCarthy, Ali Smith, Zadie Smith, and David Foster Wallace, this book identifies how fiction prompts readers to become peripherally aware of their own attention. Contemporary Fictions of Attention

locates a common interest in attention within 21st-century fiction and connects this interest to a series of debates surrounding ethics, temporality, the everyday, boredom, work, and self-discipline in contemporary culture."--Bloomsbury Publishing.

Sommario/riassunto

Placed in context with an introductory and concluding chapter, this book provides a summary and analysis of the 20 most significant Supreme Court cases dealing with criminal procedure, which have had the greatest impact on police investigatory practices and prosecutorial conduct. These cases have defined the parameters of police and prosecutorial activities and are crucial to an understanding of the law of search and seizure and criminal prosecution.
