

1. Record Nr.	UNISALENTO991001304029707536
Autore	Chang, Tung
Titolo	The Riemann problem and interaction of waves in gas dynamics / Tung Chang, Ling Hsiao
Pubbl/distr/stampa	Harlow : Longman, 1989
ISBN	058201378X
Descrizione fisica	ix, 272 p. ; 24 cm.
Collana	Pitman monographs and surveys in pure and applied mathematics, ISSN 02693666 ; 41
Classificazione	AMS 76N LC QA927.C43
Altri autori (Persone)	Xiao, Lingauthor
Disciplina	531.1133
Soggetti	Riemann-Hilbert problems Shock waves
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Sommario/riassunto

This paper constructs a coincident indicator for the Gulf Cooperation Council (GCC) area business cycle. The resulting coincident indicator provides a reliable measure of the GCC business cycle; over the last decade, the GCC coincident index and the real GDP growth have moved closely together. Since the indicator is constructed using a small number of common factors, the strong correlation between the indicator and real GDP growth points to a high degree of commonality across GCC economies. The timing and direction of movements in

macroeconomic variables are characterized with respect to the coincident indicator. Finally, to obtain a meaningful economic interpretation of the latent factors, their behavior is compared to the observed economic variables.
