

1. Record Nr.	UNISA996464387803316
Autore	Subrahmanian V. S.
Titolo	A machine learning based model of Boko Haram / / V. S. Subrahmanian [and three others] ; foreword by Geert Kuiper
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-60614-7
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (XII, 135 p. 38 illus., 29 illus. in color.)
Collana	Terrorism, Security, and Computation
Disciplina	363.32
Soggetti	Terrorism - Forecasting Terrorism - Prevention
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1: Introduction -- Chapter 2: History of Boko Haram -- Chapter 3: Temporal Probabilistic Rules and Policy Computation Algorithms -- Chapter 4: Sexual Violence -- Chapter 5: Suicide Bombings -- Chapter 6: Abductions -- Chapter 7: Arson -- Chapter 8: Other Types of Attacks -- Appendix A: All TP-Rules -- Appendix B: Data Collection -- Appendix C: Most Used Variables -- Appendix D: Sample Boko Haram Report.
Sommario/riassunto	This is the first study of Boko Haram that brings advanced data-driven, machine learning models to both learn models capable of predicting a wide range of attacks carried out by Boko Haram, as well as develop data-driven policies to shape Boko Haram's behavior and reduce attacks by them. This book also identifies conditions that predict sexual violence, suicide bombings and attempted bombings, abduction, arson, looting, and targeting of government officials and security installations. After reducing Boko Haram's history to a spreadsheet containing monthly information about different types of attacks and different circumstances prevailing over a 9 year period, this book introduces Temporal Probabilistic (TP) rules that can be automatically learned from data and are easy to explain to policy makers and security experts. This book additionally reports on over 1 year of forecasts made using the model in order to validate predictive accuracy. It also introduces a policy computation method to rein in Boko Haram's

attacks. Applied machine learning researchers, machine learning experts and predictive modeling experts agree that this book is a valuable learning asset. Counter-terrorism experts, national and international security experts, public policy experts and Africa experts will also agree this book is a valuable learning tool.

2. Record Nr.	UNISALENT0991001416329707536
Autore	Taverniers, Miriam
Titolo	Metaphor and metaphorology : a selective genealogy of philosophical and linguistic conceptions of metaphor from Aristotle to the 1990s / Miriam Taverniers
Pubbl/distr/stampa	Gent : Academia, [2002]
Descrizione fisica	XI, 207 p. : [1] c. di tav. ; 25 cm
Collana	Studia Germanica Gandensia. Libri ; 1
Soggetti	Metafora
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Bibliografia: p. 179-197. Indici
