ISBN	0-262-30867-3 1-282-10032-7 9786612100321 0-262-28401-4 0-585-38762-1
Descrizione fisica	1 online resource (403 p.)
Collana	Politics, science, and the environment Learning to manage global environmental risks ; ; v. 1
Disciplina	363.7/05
Soggetti	Environmental policy Environmental management Global environmental change
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	v. 1. A comparative history of social responses to climate change, ozone depletion, and acid rain -- v. 2. A functional analysis of social responses to climate change, ozone depletion, and acid rain. 1. Overview -- 2. Studies of arenas.
Sommario/riassunto	This long-awaited two-volume book examines how the interplay of ideas and actions applied to environmental problems has laid the foundations for global environmental management. It looks at how ideas, interests, and institutions affect management practice; how management capabilities in other areas affect the ability to deal with specific environmental issues; and how learning affects society's approach to the global environment. The book focuses on efforts to deal with climate change, ozone depletion, and acid rain from 1957 (The International Geophysical Year) through 1992 (the UN Conference on Environment and Development). The settings include Canada, Germany, Hungary, Japan, Mexico, the Netherlands, the former Soviet

Union, the United Kingdom, the United States, and international environmental organizations. Topics include problem framing, agenda setting, issue attention, risk assessment, monitoring, option assessment, goal and strategy formulation, implementation, and evaluation. Volume 1 provides an overview of the project, of global environmental management in general, and of the three central environmental issues studied; it also contains the individual country studies. Volume 2 contains the management function studies and the book's conclusion. Authors in the set include Jeannine Cavender-Bares, William C. Clark, Ellis Cowling, Nancy M. Dickson, Gerda Dinkelman, Rodney Dobell, Renate Ell, Adam Fenech, Alexander Ginzburg, Elena Goncharova, Peter Haas, Eva Hizsnyik, Michael Huber, Peter Hughes, Jill Jager, Marc Levy, Angela Liberatore, Diana Liverman, Justin Longo, David McCabe, Donald Munton, Elena Nikitina, Karen O'Brien, Edward Parson, Vladimir Pisarev, Ruud Pleune, Miranda Schreurs, Simon Shackley, Peter Simmons, Heather Smith, Vassily Sokolov, Ferenc L. Toth, Jeroen van der Sluijs, Josee van Eijndhoven, Claire Waterton, Cor Worrell, and Brian Wynne. More information is available from the SLG web site.
